Shell Guide To Yacht Navigation:

The Shell Guide to Yacht Navigation John O. Coote, 1987-01-01 **Cruising (With) Class** Stan Zimmerman, 2007-02-26

Many beginning sailors soon yearn for a larger boat with a galley head and berths so they can extend their time on the water and range of action. However, the simple mechanics of sailing do not include the variety of arts necessary to cruise successfully. *Cruising with Class* began as a series of lectures at the Sarasota Florida Sailing Squadron with the intention of teaching basic skills to beginning cruisers. Comfort on the water is not a matter of soft cushions. It comes from confidence in the ability to voyage safely. Reading the weather, planting the anchor, calculating the tides, navigating a coast, avoiding fatigue, choosing equipment, coping with storms, reacting to disasters—these are the arts of a cruiser. Although the book calls on the author's 25 years of cruising small sailboats, it is not a travelogue. Instead, it is a precise iteration of lessons learned the hard way and presented in sailor-to-sailor fashion so others can avoid disaster and find comfort bred in confidence on the water.

Boating Information, 1992 **Mexico Boating Guide** Patricia Rains, 2006. This book and its text, charts, illustrations, and photos are to be used for planning and reference purposes only. They are specifically not to be used for navigation. The text has been prepared based upon personal inspections, official publications, and other data deemed reliable with the objective of making the boating visitor's voyage more enjoyable. **Bibliography of Nautical Books** Alan Obin, 2000-02

This is the 15th annual edition of the *Bibliography of Nautical Books*, a reference guide to over 14,000 nautical publications. It deals specifically with the year 2000. *The Shell Channel Pilot* Tom Cunliffe, 2021-04-01. South coast of England, the North coast of France, and the Channel Islands.

Crash Dive Larry Bond, 2011-03-29. They are the ultimate unseen deterrent in modern warfare. Thousands of tons of steel missiles, torpedoes, and men lurking silently hundreds of feet underwater, able to lie off any coastline and unleash a devastating hail of destruction with pinpoint accuracy. They are the true masters of the oceans, striking swift and unseen, before slipping away, ready to do it all over again at a moment's notice. Submarines and their crews have long held a revered place in the military, with a special place of honor reserved for those men who willingly seal themselves in what could amount to a nuclear-powered coffin for months on end. Although the submarine is a relatively recent development in the field of warfare, many of the men who live and fight in these steel fish have already become legends. Edited by bestselling author Larry Bond, *Crash Dive* collects the best nonfiction writing about these near-silent killers of the deep and their crews. From the tough Gato-class boats that harassed the Japanese Navy during World War II to the cat-and-mouse games played by U.S. and Soviet submarines during the Cold War, *Crash Dive* will take you inside the deep and deadly world of the military submarine. **Breaking the Shell** Joseph H. Genz, 2018-02-28. On the atoll of Rongelap in the northern seas of the Marshall Islands, apprentice navigators once learned to find their way across the ocean by remotely sensing how islands transform the patterning of swell and currents. Renowned for their instructional stick charts that model and map the interplay of islands and waves, these students of wave-piloting techniques embarked on trial voyages to ruru
