British Seashells Paul Chambers,2010-03-10 Using original Victorian prints by collectable artist George Sowerby marine biologist and author Paul Chambers has produced the first comprehensive guide to shells for over a century The original prints are intricately detailed much better than photographs which lack the exact detail of these drawings and are a selling point in themselves but will be complemented by informative but accessible text including families and to show what is edible dangerous or belongs to mollusc families and in what part of the country they can be discovered A delightful study by the leading expert and a must for anyone interested in learning more about shells or who just enjoys beachcombing with the family **List of the Ostological Specimens of the British Museum** ,1847 Hand-list of the Specimens of Shield
