From Narratology to Computational Story Composition and Back Leonid Berov, 2023-03-15 Although both deal with narratives the two disciplines of Narrative Theory NT and Computational Story Composition CSC rarely exchange insights and ideas or engage in collaborative research The former has its roots in the humanities and attempts to analyze literary texts to derive an understanding of the concept of narrative The latter is in the domain of Artificial Intelligence and investigates the autonomous composition of fictional narratives in a way that could be deemed creative The two disciplines employ different research methodologies at contradistinct levels of abstraction making simultaneous research difficult while a close exchange between the two disciplines would undoubtedly be desirable not least because of the complementary approach to their object of study This book *From Narratology to Computational Story*

Composition and Back describes an exploratory study in generative modeling a research methodology proposed to address the methodological differences between the two disciplines and allow for simultaneous NT and CSC research It demonstrates how implementing narratological theories as computational generative models can lead to insights for NT and how grounding computational representations of narrative in NT can help CSC systems to take over creative responsibilities It is the interplay of these two strands that underscores the feasibility and utility of generative modeling The book is divided into 6 chapters an introduction followed by chapters on plot fictional characters plot quality estimation and computational creativity wrapped up by a conclusion The book will be of interest to all those working in the fields of narrative theory and computational creativity

A Good Year On Belle Ile en Mer Byron Lehman, Belle le en Mer is a placid jewel off the French coast in the Bay of Biscay Its rocky shores are said to be at times brutal yet surrounded by a brushed blue sea and a clear blue celestial canopy overhead The sandy beaches adorn it like sequins dashed along the fringes of a majestic robe It is neither costumed in opulence nor shrouded in poverty It is gentle and inviting It is a secret place and a place for privacy It is an island that listens and never speaks Its secrets are carried far by the winds and scattered among the swells beyond It is more than the common humble farms modest homes tranquil green pastures gentle sloops and rounded hilltops It is not the small clusters of houses huddled into bergs and villages quietly existing for the sake of trust fidelity and friendship It is all things in concert Like the face of beauty grace and elegance It is a confident smile amid the sea Some say the best things in life are the things not planned and the randomly unexpected Rich Larsen never knew of Belle le en Mer s existence until a few months before his arrival It is there he resides for the next year of his life That year will be like no year he will ever experience again It is far beyond the adventures of the past or the unseen ahead His heart will remain there forever

Atlantic Afterlives in Contemporary Fiction S. Ahlberg, 2016-04-08 Atlantic Afterlives in Contemporary Fiction offers fresh readings of what has been called transatlantic literature In selected twentieth and twenty first century texts it discovers a shift from oceanic place based knowledge to an atmospheric placeless circulation of information Consonant with the displacements of the Information Age this book reads contemporary narrative as it imagines and navigates today s virtual spaces An important conclusion of the book is that intellectual resources are finite and should be used sustainably Thus arguing against a conventional comparative approach this book proposes reading practices that resist the tendency toward an oversupply of reworked literary contexts that seems bent on matching the reach of the World Wide Web Instead the book reimagines place as a practice in the way it is communicated and narrated Ultimately this book empowers the reader to reimagine a future for narrative in the Information Age
