Blake, 2008-04-24 In clear congenial style Barry Blake explains how language works He describes the make up of words and how they re built from sounds and signs and put together in phrases and sentences He examines the dynamics of conversation and the relations between the sound and meaning He shows how languages help their users connect to each other and to the world how they vary around the world why they never stop changing and that no two people speak a language in the same way He looks at how language is acquired by infant children how it relates to thought and its operations in the brain He investigates current trends and issues such as the levelling of linguistic class differences and the rise of new secret or in group languages such as argot and teenspeak He describes the history of writing from its origins to digital diffusion and ends by looking at how language might have originated and then evolved among our distant hominid and primate ancestors Language is crucial to every aspect of our lives whether we re thinking talking or dreaming Barry Blake reveals the wonders that lie beneath the surface of everyday communication enriching his exposition with a unique blend of anecdote and humour His engaging guide is for everyone curious about language or who needs to know more about it

Looking Like a Language, Sounding Like a Race Jonathan Rosa, 2019

Looking like a Language Sounding like a Race examines the emergence of linguistic and ethnoracial categories in the context of Latinidad The book draws from more than twenty four months of ethnographic and sociolinguistic fieldwork in a Chicago public school whose student body is more than 90% Mexican and Puerto Rican to analyze the racialization of language and its relationship to issues of power and national identity It focuses specifically on youth socialization to U S Latinidad as a contemporary site of political anxiety raciolinguistic transformation and urban inequity Jonathan Rosa s account studies the

fashioning of Latinidad in Chicago's highly segregated Near Northwest Side he links public discourse concerning the rising prominence of U S Latinidad to the institutional management and experience of raciolinguistic identities there Anxieties surrounding Latinx identities push administrators to transform at risk Mexican and Puerto Rican students into young Latino professionals This institutional effort which requires students to learn to be and importantly sound like themselves in highly studied ways reveals administrators attempts to navigate a precarious urban terrain in a city grappling with some of the nation's highest youth homicide dropout and teen pregnancy rates Rosa explores the ingenuity of his research participants responses to these forms of marginalization through the contestation of political ethnoracial and linguistic borders

Language Through the Looking Glass Marina Yaguello,1998 To play with language is to break its rules disrupt its patterns exploit its weak points Thus paradoxically puns and spoonerisms neologisms and slogans reveal and highlight the patterns to which discourse conforms patterns which reflect the linguistic competence of language speakers Only those who have linguistics competence can play with it thus language games and the poetic use of language are underpinned by unconscious use of linguistic analysis Using Lewis Carroll's Alice as a starting point Marina Yaguello takes the reader on an unconventional voyage around language charting the major themes of linguistics on the way She shows that we can come to an understanding of language in general and of particular languages through exploring the devices of humour word games and poetry devices which reveal the unconscious linguist in all of us The result is an entertaining but rigorous introduction to language and linguistics for non specialists and students alike

Generative Linguistics Frederick J. Newmeyer, 2002-09-11 Written by one of America's most prominent linguists the essays in *Generative Linguistics* provide a challenging reappraisal of the Chomskian Revolution the implications of which are still being debated some three decades on Here together for the first time are all of Frederick J Newmeyer's writings on the origins and development of generative grammar Spanning a period of fifteen years the essays address the nature of the Chomskian Revolution the deep structure debates of the 1970s and the attempts to apply generative theory to second language acquisition

Rightward Movement Dorothee Beerman, David LeBlanc, Henk C. van Riemsdijk, 1997 Symmetries and asymmetries have always played an important role in linguistic theorizing From the early works on potentially universal properties of transformational processes differences between rightward and leftward movement processes were noted and constituted a challenge to theories of conditions on transformations The upward boundedness of extraposition rules vs the successive cyclic character of question word movement for example remains a vexing problem An idea which has gained considerable prominence in the most recent syntactic work in particular Noam Chomsky's Minimalist Program and Richard Kayne's Antisymmetry proposal is that rightward movement simply does not exist This means in essence that what looks like an element that has been moved rightward is either base generated in its surface position or it is actually moved leftward but all its surrounding materials have been moved leftward even further Clearly these radical proposals have generated a large number of new analyses of the relevant phenomena and they have fostered considerable controversy about the viability and desirability of this type of approach The present volume brings together a representative group of articles discussing a variety of aspects of apparent rightward movement processes including considerations having to do with parsing and representing the various opposing lines of thought on this matter Empirically they cover a wide array of constructions extraposition scrambling quantifier floating etc and languages American Sign Language Bengali Dutch French Frisian German Hindi Japanese Marathi etc
