Looking At Cities:

Looking at Cities Allan B. Jacobs, 1985 Allan Jacobs has written a city planning book for everyone with a passion for urban environments His message conveyed in word and vivid image is that the people who make changes in cities base their decisions upon what they see and that their visions and actions which affect the lives of millions have too often been faulty This book is about how to look at and understand urban environments In order to plan sensitively the city and regional planner must walk in look at wonder about and simply enjoy cities Careful observation is a crucial tool for the kind of analysis and questioning necessary to achieve good planning Through observation the city planner and urban activist can learn when an area was built for whom it was built who lives there now how it has changed and how it might be improved for present and future inhabitants Jacobs shows us how to read cities by identifying and discussing the many visual clues and their various meanings in different environments Case studies of American and European cities San Jose San Francisco Cincinnati Bologna Rome and over two hundred striking photographs drawings and maps by the author present ways to read the environment that will prove indispensable for urban planners and will delight all city watchers *Why Cities Look the Way They Do* Richard J. Williams, 2019-08-08 We tend to think cities look the way they do because of the conscious work of architects planners and builders But what if the look of cities had less to do with design and more to do with social cultural financial and political processes and the way ordinary citizens interact with them What if the city is a process as much as a design Richard J Williams takes the moment construction is finished as a beginning tracing the myriad processes that produce the look of the contemporary global city This book is the story of dramatic but unforeseen urban sights how financial capital spawns empty towering skyscrapers and hollowed out ghettos how the zoning of once illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks concrete and glass that surround us Thought provoking and original *Why Cities Look the Way They Do* will appeal to anyone who wants to understand the contemporary city shedding new light on humanity's greatest collective invention **Historic Cities** Jeff Cody, Francesco Siravo, 2019-07-30 This new volume in the GCI's Readings in Conservation series brings together a selection of seminal writings on the conservation of historic cities This book the eighth in the Getty Conservation Institute's Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more

than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

Cities in the Sand Kenneth D. Matthews, Alfred W. Cook, 2018-12-02 Today the ancient Roman towns of Leptis Magana and Sabratha on the Mediterranean coast of Libya attract only a few curious travelers But two thousand years ago they were thriving commercial and agricultural centers whose value to Rome was measured by the wealth of produce shipped annually to the cities of the Empire This volume is primarily an introduction to the personality of these two towns recovered by archaeologists from the burying sands only in relatively recent years The text offers a concise and informative survey of the history of the region known as Tripolitania and examines the cultural and social life of Leptis Magna and Sabratha as reflected in the magnificent ruins depicted in the accompanying plates The first chapter provides an understanding of Roman government and organization in Africa from the time of Scipio's destruction of Carthage in 146 B C until the beginning of Mohammedan rule in 698 A D This discussion gives perspective to the life of Leptis Magna and Sabratha by placing it in context with Roman Africa in general explaining the various political divisions of the Roman provinces as well as the manner of civil and military administration

under early imperial Roman Vandal and Byzantine rule The second and third chapters deal respectively with the particular ruins of the two towns Although both Leptis Magana and Sabratha unlike their sister city Oea or modern Tripoli succumbed to the smothering weight of drifting sand dunes they are made to live again in the pages of this volume Kenneth Matthews text is an excellent summary of life in Roman times while the photographs by Alfred Cook provide views unsurpassed in beauty and clarity of detail of the buildings and art that once flourished along the rim of the Mediterranean Sea Cities and Stability Jeremy L.
