Looking Back from 2101 Steve Halpern, 2002-01-08 During the 1990s the politicians and media pundits argued that we experienced the most dramatic financial upturn in the history of the United States Yet today in the year 2001 forty five million people lack health insurance thirty five million experience hunger millions are functionally illiterate and anyone living in Philadelphia who earns the minimum wage needs to work eighty four hours per week to avoid homelessness When we look at the facts the so called financial upturn of the 1990s was a myth for eighty percent of the population Today when we adjust for inflation the least affluent eighty percent of the population earns no more than they did in the early 1970s yet they routinely work more hours As harsh as all these conditions are an all out collapse of the economy is possible in our lifetimes While these conditions exist an enormous amount of waste is generated in the world Whether we purchase a tooth pick or a town house we pay for services which add nothing to those commodities When we need medical care we would never go to an insurance agent yet insurance companies profit off of our need for health care When we purchase a house we dont rely on bankers to build the house yet banks collect enormous sums in interest payments for the purchase of homes When we turn on the television we see advertising which adds nothing to the quality of the programming yet we pay more for commodities because of advertising These few examples show how there are enormous resources which could be used to make dramatic improvements in the standard of living throughout the world

Looking Back From 2101 is a novel which imagines what the world might look like if human needs were the top priority and the primary motivating force of society was human solidarity This book has a similar theme as Looking Backwards by Edward Bellemey which was written in 1887 and sold millions of copies throughout the world Harry Goldberg is a factory worker in the year 2001 One night he goes to sleep and doesnt awaken until the year 2101 In this world of the future Harry discovers that poverty has been eliminated yet people are only asked to work for twenty hours per week The government strives to eliminate alienation from the workplace and to organize industrial production in a way that is harmonious with the environment Everyone who is born into this world has many rights which they can use throughout their lifetimes These

include the right to food clothing housing health care education communication transportation and exposure to the arts or recreational activities Everyone is also encouraged to offer their opinions concerning any and all topics From the perspective of this future world Harry proceeds to have a series of conversations with African Americans women a Puerto Rican a Native American a farmer a garment worker a doctor and a student where they explore how and why the world was transformed Harry begins to realize that all the advances which he is witnessing in this new world were indeed possible in the twentieth century These changes didnt occur because of scientific achievements or brilliant political leaders The transformation of society came about because of the determination of the masses of people to construct a world where human needs are more important than profits and human solidarity is the best way of motivating working people Looking Back From 2101 is an attempt to contrast the world as it exists from the world as it might be While politicians and media pundits tell us what we cant achieve this book makes an attempt to look at what is possible

The Magazine of Wall Street ,1927 **Going Back for Our Future** Jon Pedersen,Kevin D. Finson,Barbara S. Spector,Paul Jablon,2013-04-01 This book is the first volume of an attempt to capture and record some of the answers to these questions either from the pioneers themselves or from those persons who worked most closely with them We know there are many pioneers and early trailblazers who are not included in this volume but there are other volumes to follow As we have posed questions rummaged through files and oft neglected books and probed the memories of many individuals we have come to realize our list of true pioneers is ever growing There are names on the list that most of us readily recognize and there are names of whom few of us have heard yet who were significant in their roles as mentors or idea development and teaching We quickly discovered that the family tree showing connections between these people is not a neat clean simple branching tree but is more like spaghetti The connections are many are intertwined and all have their significance The stories in this volume demonstrate how vital this network was in supporting the individual pioneers during their journey in difficult times and continues to be for those of us today in our own enterprise
