Lordship In France 500 15:

Lordship in France, 500-1500 James Lowth Goldsmith, 2003 Lordship in France 500 1500 presents a new interpretation of lordship in medieval France based on recent ground breaking research on the Merovingian Carolingian and Capetian eras of lordship in medieval France In the standard interpretation lordship emerged around the year 1000 when landed magnates and armed adventurers usurped public authority from the collapsing Carolingian state This book argues instead that lordship emerged roughly 500 hundred years earlier with the disintegration of the Roman Empire Politically and socially lordship expressed the collegial ruling authority of kings and aristocrats not the usurped public authority of a failed centralized state Institutionally lordship was essentially a fiscal apparatus that perpetuated remnants of the late Roman tax system

Agrarian Change and Crisis in Europe, 1200-1500 Harilaos Kitsikopoulos, 2012-03-15 Agrarian Change and Crisis in Europe 1200 1500 addresses one of the classic subjects on economic history the process of aggregate economic growth and the crisis that engulfed the European continent during the late Middle Ages This was not an ordinary crisis During the period 1200 1500 Europe witnessed endemic episodes of famine and a wave of plague epidemics that amounted to one of its worst health crises rivaled only by the Justinian plague in the sixth century These challenges called into question the production of goods and services and the distribution of wealth opening the possibility of fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region **Lordship and the**

Decentralized State in Late Medieval Europe Erika Graham-Goering, Jim van der Meulen, Frederik Buylaert, 2025-01-23 Lordship and the Decentralized State in Late Medieval Europe rethinks the rise of modern European states as a process of decentralization The idea that states made lordships obsolete is challenged by showing how the distribution of authority among local lords reinforced the development of new political systems Sussex Archaeological Collections Relating to the
