Hoogeveen,2006-07 Newly revised guide to the best paddling trips in Iowa contains trip ideas and environmental geological and historic points of interest Maximal God Yujin Nagasawa,2017 Yujin Nagasawa presents a new stronger version of

perfect being theism the conception of God as the greatest possible being Although perfect being theism is the most common form of monotheism in the Judeo Christian Islamic tradition its truth has been disputed by philosophers and theologians for centuries Nagasawa proposes a new game changing defence of perfect being theism by developing what he calls the maximal concept of God Perfect being theists typically maintain that God is an omniscient omnipotent and omnibenevolent being according to Nagasawa God should be understood rather as a being that has the maximal consistent set of knowledge power and benevolence Nagasawa argues that once we accept the maximal concept we can establish perfect being theism on two grounds First we can refute nearly all existing arguments against perfect being theism simultaneously Second we can construct a novel strengthened version of the modal ontological argument for perfect being theism Nagasawa concludes that the maximal concept grants us a unified defence of perfect being theism that is highly effective and economical

Atlantis Emmet John Sweeney, 2010. Historian Emmet Sweeney persuasively intertwines history and literary references with hard science from archaeology and anthropology to genetics and geology to prove the existence of an ancient trans Atlantic link between the Old World and the New. Sweeney examines the geological certainty of a sunken island in the Azores, the Human Genome Project's startling revelation that 3% of Native American DNA is characteristic of people of south west Europe and the Atlas Mountains whose inhabitants as late as Roman times called themselves Atlanteans, archaeological and cultural proof of a relationship between the Stone Age and Early Bronze Age civilizations of North America and South West Europe, the occurrence of cocaine and tobacco, two American narcotics in many Egyptian mummies. Piece by piece Sweeney constructs a compelling case for not just the probability but the necessity of an Atlantic stepping stone, the missing link that transmitted both the culture and biology of Europe to America millennia before Columbus. **Atlantis: The Evidence of Science** argues as never before that Atlantis should rise to take its place in history, not myth.

A Cosmological Reformulation of Anselm's Proof That God Exists Richard Campbell, 2021-11-15. In this book Richard Campbell reformulates Anselm's proof to show that factual evidence confirmed by modern cosmology validly implies that God exists. Anselm's proof, which was never the ontological argument attributed to him, emerges as engaging with current philosophical issues concerning existence and scientific explanation. Because every observable thing has a beginning, it can be deduced that there is always in reality something than which a greater cannot be thought, which exists necessarily. It follows that its non-existence is inconceivable. Anselm then proves that this is the God in whom he believes, who alone so truly exists that He could not be thought not to exist. The contingent nature of the universe is therefore a consequence of the proven belief that God is the Creator of everything else.

The Immateriality of the Human Mind, the Semantics of Analogy, and the Conceivability of God (Volume 1) Gyula Klima, 2011-09-22. The Immateriality of the Human Mind, the Semantics of Analogy, and the Conceivability of God brings together the work of experts in the field of medieval philosophy to consider the nature of God and the soul, what can be known of the divine essence, and the semantics of theological discourse from the perspectives of medieval

theology both natural and revealed logic and natural philosophy In his capacity as an arts master commenting on a work of natural philosophy Aristotle's De Anima John Buridan discusses the immateriality of the intellect against the background of the competing mutually exclusive views of Alexander of Aphrodisias and Averroes Aquinas takes up the same issue but in a more properly theological setting in his Commentary on the Sentences of Peter Lombard where Aquinas argues that the being of the intellect is independent of matter Thomas de Vio Cajetan considers the semantics of theological discourse or God talk in order to derive a proper means to speak of the divine essence in his De Nominum Analogia and Anselm of Canterbury's Proslogion seeks with unaided reason to develop a single proof whereby those who think seriously of anything as that than which nothing greater can be thought may know that God exists

Irish Children's Literature and the Poetics of Memory Rebecca Long, 2021-03-25 Focusing on the mythological narratives that influence Irish children's literature this book examines the connections between landscape time and identity positing that myth and the language of myth offer authors and readers the opportunity to engage with Ireland's culture and heritage It explores the recurring patterns of Irish mythological narratives that influence literature produced for children in Ireland between the nineteenth and the twenty first centuries A selection of children's books published between 1892 when there was an escalation of the cultural pursuit of Irish independence and 2016 which marked the centenary of the Easter 1916 rebellion against English rule are discussed with the aim of demonstrating the development of a pattern of retrieving re telling remembering and re imagining myths in Irish children's literature In doing so it examines the reciprocity that exists between imagination memory and childhood experiences in this body of work
