Knowledge and Culture in the Early Dutch Republic Klaas Berkel, Albert Clement, Arjan Dixhoorn, 2025-10-01 The Dutch Republic around 1600 was a laboratory of the Scientific Revolution of the seventeenth century Here conditions were favourable for the development of new ways of knowing nature and the natural philosopher Isaac Beeckman who was born in Middelburg in 1588 was a seminal figure in this context He laid the groundwork for the strictly mechanical philosophy that is at the heart of the new science Descartes and others could build on what they learned directly or indirectly from Beeckman As previous studies have mainly dealt with the scientific content of Beeckman s thinking this volume also explores the wider social scientific and cultural context of his work Beeckman was both a craftsman and a scholar and fruitfully combined artisanal ways of knowing with international scholarly traditions Beeckman s extensive private notebook offers a unique perspective on the cultures of knowledge that emerged in this crucial period in intellectual history

Tools and the Organism Colin Webster, 2023-11-24 Medicine is itself a type of technology involving therapeutic tools and substances and so one way to write the history of medicine is as the application of different technologies to the human body In *Tools and the Organism* Colin Webster argues that over the course of antiquity notions shifted about what type of object a body is what substances constitute its essential nature and how its parts interact By following these changes and taking the question of technology into the heart of Greek and Roman medicine Webster reveals how the body was first conceptualized as an organism a functional object whose inner parts were tools organs that each completed certain vital tasks Webster's approach provides both an overarching survey of the ways that technologies impacted notions of corporeality and corporeal behaviors and at the same time stays attentive to the specific material details of ancient tools and how they informed assumptions about somatic structures substances and inner processes For example by turning to developments in water delivery technologies and pneumatic tools we see how these changing material realities altered theories of the vascular system and respiration across Classical antiquity *Tools and the Organism* makes the compelling case for why telling the history of ancient Greco Roman medical theories from the Hippocratics to Galen should pay close attention to the question of technology

Selling points Tour de force survey of ancient medicine First book to demonstrate how the body got its organs and what this has to do with ancient technologies For anyone interested in ancient culture science medicine and technology
