Negotiating Health Care Sally E. Thorne, 1993-03-24 Contributing a unique perspective to health reform *Negotiating Health Care* presents the findings of a large qualitative investigation of the experiences of the chronically ill within today's health care system. The author develops the argument that chronic illness and acute illness are social experiences of a vastly different order that lead to different health care consequences especially in a health system geared to the miracle cure. From interviews with chronically ill patients Thorne discusses the onset of their diseases handling acute episodes and their attempts to normalize life. The author also examines the interpersonal experience with health care providers exploring the issues of trust confidence and compliance. The institutional experience can and often does pose daunting problems for the chronically ill because of organizational and sociocultural issues health care politics and ideology and the individual patient's response to the system. In her concluding chapter Thorne proposes future directions for health care organization biomedical technology and social policy. Students and professionals in the fields of nursing allied health medical sciences and human services will find *Negotiating Health Care* a valuable resource. This book is highly recommended for all health care professionals and anyone involved in legislation regarding chronic health care on a national basis. The book also could be very useful for lay people who are chronically ill and for their caregivers and families. *Rehabilitation Nursing* Finally a window is opened to the experience of chronic illness as it exists within the North American health care system. Just in time. Every health care provider and reformer who looks inside will be changed by the reflections of themselves they see. This book is a courageous voice for both the bolder more conclusive clinical research and for the chronically ill who may yet show us a better way. William L. Miller M.D. The University of Connecticut. Although there are a number of texts available on chronic illness Dr. Thorne's approach to the topic is unique in that it provides a graphic illustration of how the beliefs and values guiding the health care system contribute to problems which the chronically ill encounter in obtaining care. By setting the experience of chronic illness in the broader context of the health care system the book provides some clear guidelines for needed changes something I have not found elsewhere. This is a valuable piece of work which is a valuable contribution to our understanding of chronic illness and which provides a guide both to practice and to health policy revision. Lee Walker R.N. Ph.D. The University of Utah. This extraordinary book provides rich description and unique insights into the illness experience. Data obtained from interviews with 91 informants provides remarkable detail strong linkages to existing theory and powerful development of the illness trajectory. The book is well documented methodologically rigorous and presented in a refreshing style. Dr. Thorne has written a classic. *Negotiating Health Care* will become the book of the 90s for anyone interested in providing humanistic care. Jan Morse R.N. Ph.D. College of Health and Human Development The Pennsylvania State University. The book provides a view into the major issues adults with chronic illness experience in obtaining health care a perspective that is rarely available to those of use who use the health care system mainly for acute problems or indeed who are the

providers The book is powerful intense and often uncomfortable reading the patients own words should sensitize all of us who work with the chronically ill Verbatim accounts of patients experiences are woven into a lucid and perceptive view of the structure and organization of Canadian health care which should be read by health policymakers in all the western industrialized countries Juliene G Lipson Ph D F A A N University of California San Francisco Thorne takes a unique approach in providing a graphic illustration of how the beliefs and values guiding the health care system contribute to the problems the chronically ill encounter in obtaining care Those concerned with the evolving social and health policy in the United States would be well served in reading *Negotiating Health Care* Academic Library Book Review

Psychiatric Social Work in Great Britain Noel Timms, 2018-12-07 Originally published in 1964 *Psychiatric Social Work* looks at psychiatric social work as an established form of professional social work in Great Britain as well as the mental health policy introduced at the time of the book's publication The book looks at how social workers in the 1960s were striving for professional status and the interest that grew around their professional status during this period The book examines changes and issues in their training and a general picture of those who qualified It looks at the careers of a group of social workers and follows the developments in child guidance mental hospitals and the care of the mentally ill in the community The contribution of social workers is discussed and their activities of the professional associations in training and professional development is examined This book will act as an important historical look at the changes to social work

Negotiating Partnerships with Older People Brendan McCormack, 2017-07-12 This title was first published in 2001 Much discussion takes place concerning the nature of the relationship between nurses and older people in hospital and there have been many concerns expressed in United Kingdom policy documents about the quality of care for older people in hospitals Autonomy is considered to be one of the central ethical principles of health care practice and as such is a significantly relevant concept for nurses This book presents the results of a study undertaken with nurses who work with older people in hospitals Issues arising from the study include the effects of institutional constraints on autonomy A framework for person centred practice has been developed from this work that emphasizes the values of the individual and their needs wants and desires The role of the nurse in facilitating practice that respects an individual's values is outlined and the importance of nurses in negotiating relationships with older people is also emphasized
