

Gravitation universelle

La loi de gravitation :

Interaction gravitationnelle

Interaction attractive entre deux objets massiques

deux objets massiques (qui ont une masse) quel qu'ils soient, exercent l'un sur l'autre une **action mécanique attractive**.

Entre deux objets massiques, il existe une **interaction attractive dite de gravitation**.

Loi de gravitation

Deux objets A et B, de masses respectives m_A et m_B dont les centres sont séparés par une distance d , exercent l'un sur l'autre des actions mécaniques attractives modélisées par des forces ayant la même intensité :

$$F = G \times \frac{m_A \times m_B}{d^2}$$

Thanh Van Tran, 1996 **An Introduction to Relativistic Gravitation** Remi Hakim, 1999-05-20 This is an introductory textbook on applications of general relativity to astrophysics and cosmology The aim is to provide graduate students with a toolkit for understanding astronomical phenomena that involve velocities close to that of light or intense gravitational fields The approach taken is first to give the reader a thorough grounding in special relativity with space time the central concept following which general relativity presents few conceptual difficulties Examples of relativistic gravitation in action are drawn from the astrophysical domain The book can be read on two levels first as an introductory fast track course and then as a detailed course reinforced by problems which illuminate technical examples The book has extensive links to the literature of relativistic astrophysics and cosmology *An Introduction to General Relativity and Cosmology* Jerzy Plebanski, Andrzej Krasinski, 2024-06-06 Experts introduce the tools of GR and relativistic cosmology guiding advanced students through complete derivations of the results **Very High Energy Phenomena in the Universe** Yannick Giraud-Héraud, J. general relativity which also constitutes the theoretical foundations of numerical relativity. The book starts by establishing the mathematical background: differential geometry, hypersurfaces embedded in space-time, foliation of space-time by a family of space-like hypersurfaces, and then turns to the 3+1 decomposition of the Einstein equations giving rise to the Cauchy problem with constraints which constitutes the core of 3+1 formalism. The ADM Hamiltonian formulation of general relativity is also introduced at this stage. Finally, the decomposition of the matter and electromagnetic field equations is presented focusing on the astrophysically relevant cases of a perfect fluid and a perfect conductor ideal magnetohydrodynamics. The second part of the book introduces more advanced topics: the conformal transformation of the 3-metric on each hypersurface and the corresponding rewriting of the 3+1 Einstein equations, the Isenberg-Wilson-Mathews approximation to general relativity, global quantities associated with asymptotic flatness, ADM mass, linear and angular momentum, and with symmetries, Komar mass and angular momentum. In the last part, the initial data problem is studied, the choice of spacetime coordinates within the 3+1 framework is discussed, and various schemes for the time integration of the 3+1 Einstein equations are reviewed. The prerequisites are those of a basic general relativity course with calculations and derivations presented in detail, making this text complete and self-contained. Numerical techniques are not covered in this book.

L'Universel (Traduit) Walter Russell, 2022-05-04. THE UNIVERSAL ONE a été publié originalement en 1927 et distribué aux meilleurs scientifiques du pays. Il est réédité en cette période cruciale dans le seul but de diffuser nouveau de nouvelles connaissances scientifiques vitales pour ce nouvel âge de nouvelle compréhension. Aujourd'hui le monde entier est dans un état de chaos luttant contre les forces de la cupidité, de l'envie, de la jalousie et de la peur. La dysharmonie est omniprésente. Toutes nos relations humaines sont violemment bouleversées. La civilisation est l'envers. La science est utilisée pour détruire et non pour construire. Nous parlons de la paix dans le monde mais ceux qui doivent planifier le nouveau monde ne connaissent pas la réponse, la solution. La connaissance actuelle de la relation de l'homme, la nature et de la loi naturelle qui contrôle ses relations humaines est jusqu'à présent inadéquate pour répondre à la situation. L'homme est encore trop proche de sa jungle pour connaître la loi qui régit inexorablement toutes ses actions et celles de la nature ou pour comprendre qu'il doit obéir à la nature ou s'autodétruire. Encore dominé par les habitudes de la jungle, il régule ses relations humaines par les méthodes de la jungle. Les guerres et le chaos mondial continueront jusqu'à ce qu'il acquière de nouvelles connaissances applicables au nouveau cycle, venir de l'évolution de l'homme. Quelles sont ces nouvelles connaissances? Une cosmogonie cohérente est cruellement nécessaire pour ce jour naissant de l'exaltation de l'homme qui est venir. Walter Russell a consacré sept années entières la rédaction de ce livre. Lorsqu'il a été publié pour la première fois en 1927, il a suscité plus de condamnation que de faveur de la part d'un monde qui n'était pas alors prêt à l'accueillir. Qu'aujourd'hui le livre malmenait science et métaphysique d'une manière qui annulait son impression sur les physiciens. Peu à peu cependant nombre de ses affirmations alors radicales ont été vérifiées par certains des plus grands scientifiques du monde et lui ont valu de nombreux adeptes. Le physicien a tracé une ligne de démarcation nette

entre les choses qu'il peut d'une certaine manière détecter par lavidence de ses sens et les choses qui se trouvent au delà de cettevidence. Il n'est pas question de nier l'existence d'une quelconque chose au delà de la portée de ses sens et de ses instruments sensoriels mais ce qui peut s'y trouver est conjectural et par conséquent inadmissible en tant que données scientifiques de nature fiable. En d'autres termes les preuves matérielles qui se situent dans les limites étroites de la portée des sens de l'homme sont les seules preuves admissibles pour la science. Mais qu'en est-il de ce vaste domaine qui ne répond pas nos corps et nos instruments sensoriels. Au cours des siècles quelques rares personnes ont tenté d'autoriser à couper les sens qui relient la matière à sa source motivée dans la conscience de l'esprit universel. Ces quelques personnes ont pris conscience du cosmos et ont essayé de faire connaître au monde sa simplicité.
