**Re-educating the Imagination** Deanne Bogdan,1992

**The Art of Teaching Music** Estelle R. Jorgensen,2024-06-06

The Art of Teaching Music takes up important aspects of the art of music teaching ranging from organization to serving as conductor to dealing with the disconnect between the ideal of university teaching and the reality in the classroom Writing for both established teachers and instructors on the rise Estelle R Jorgensen opens a conversation about the life and work of the music teacher The author regards music teaching as interrelated with the rest of lived life and her themes encompass pedagogical skills as well as matters of character disposition value personality and musicality She reflects on musicianship and practical aspects of teaching while drawing on a broad base of theory research and personal experience Although grounded in the practical realities of music teaching Jorgensen urges music teachers to think and act artfully imaginatively hopefully and courageously toward creating a better world

**The Reception of Northrop Frye** ,2021-08-31

The widespread opinion is that Northrop Frye s influence reached its zenith in the 1960s and 1970s after which point he became obsolete his work buried in obscurity This almost universal opinion is summed up in Terry Eagleton s 1983 rhetorical question Who now reads Frye In The Reception of Northrop Frye Robert D Denham catalogues what has been written about Frye books articles translations dissertations and theses and reviews in order to demonstrate that the attention Frye s work has received from the beginning has progressed at a geomantic rate Denham also explores what we can discover once we have a fairly complete record of Frye s reception in front of us such as Hayden White s theory of emplotments applied to historical writing and Byron Alm n s theory of musical narrative The sheer quantity of what has been written about Frye reveals that the only valid response to Eagleton s rhetorical question is a very large and growing number the growth being not incremental but exponential

**The Educated Imagination** Northrop Frye,2002-01-01

What good is the study of literature Does it help us think more clearly or feel more sensitively or live a better life than we could without it Written in the relaxed and frequently humorous style of his public lectures this remains of Northrop Frye s many books perhaps the easiest introduction to his theories of literature and literary education

**Values and Music Education** Estelle R.

Jorgensen,2021-11-09 What values should form the foundation of music education And once we decide on those values how do we ensure we are acting on them In Values and Music Education esteemed author Estelle R Jorgensen explores how values apply to the practice of music education We may declare values but they can be hard to see in action Jorgensen examines nine quartets of related values and offers readers a roadmap for thinking constructively and critically about the values they hold In doing so she takes a broad view of both music and education while drawing on a wide sweep of multidisciplinary literature Not only does Jorgensen demonstrate an analytical and dialectical philosophical approach to examining values but she also seeks to show how theoretical and practical issues are interconnected An important addition to the field of music education Values and Music Education highlights values that have been forgotten or marginalized

underscores those that seem perennial and illustrates how values can be double edged swords     Deracination Walter A. Davis,2001-02-15 Through a critique of history as a reality a discipline and a way of writing Deracination challenges the basic theoretical tenets of both humanism and postmodernism As a discipline history is currently undergoing what Heidegger would call a productive crisis and a number of thinkers including Michel Foucault Hayden White Paul Ricoeur and Stephen Greenblatt have begun to reexamine the cognitive assumptions and narrative paradigms that inform the discipline This book radicalizes such developments in order to construct both a new theory of history as well as a new concept of how histories should be written To make the interrogation concrete the book focuses on Hiroshima and the ways in which the trauma of that event has been repressed by the discourses that historians have fashioned in order to explain what happened on August 6 1945     Resources in Education ,1997     *The Christian Imagination* Leland Ryken,2011-12-07 The Christian Imagination brings together in a single source the best that has been written about the relationship between literature and the Christian faith This anthology covers all of the major topics that fall within this subject and includes essays and excerpts from fifty authors including C S Lewis Flannery O Connor Dorothy Sayers and Frederick Buechner     **New York Education** ,1900

**Journal of Expression** Martin Luther,1927     *End of Academic Freedom* William M. Bowen,Michael Schwartz,Lisa Camp,2014-03-01 This book is premised upon the assumption that the core purpose of universities is to create preserve transmit validate and find new applications for knowledge It is written in the perspective of critical university studies in which university governance processes should take ideas and discourse about ideas seriously far more seriously than they are often taken within many of to day s universities since doing so is the key to achieving this purpose Specifically we assert that the best way for universities to take ideas seriously and so to best achieve their purpose is to consciously recognize and conserve the entire range of available ideas Though the current emphasis upon factors such as student headcounts increased efficiency and job creation are undoubtedly important far more is at stake in universities than only these factors From this premise we deduce insights and arguments about academic freedom as well as factors such control and monitoring of the market place of ideas the structure of information flows within universities the role of language in university governance and relationships between administrators faculty members and students We identify impediments to achieving the core purpose of universities including the idea vetting systems of authoritarianism corporatism illiberalism supernaturalism and political correctness We elucidate how these impediments inhibit successful achievement of the core purpose of the university In response to these impediments we prescribe relatively autonomous universities characterized by openness transparency dissent and the maintenance of balance between conflicting perspectives values and interests     International Handbook of Education for Spirituality, Care and Wellbeing Marian de Souza,LESLIE J. FRANCIS,James O'Higgins-Norman,Daniel G. Scott,2009-10-13 Acknowledging and understanding spiritual formation is vital in contemporary education This book explores the dynamic relationship between education and wellbeing It examines the theory underpinning the practice of education in

different societies where spirituality and care are believed to be at the heart of all educational experiences The book recognizes that regardless of the context or type of educational experience education is a caring activity in which the development of the whole person body mind and spirit is a central aim for teachers and educators in both formal and informal learning The chapters in this handbook present and discuss topics that focus on spirituality as an integral part of human experience and consequently essential to educational programs which aim to address personal and communal identity foster resilience empathy and compassion and promote meaning and connectedness **Technology in Education.**
