Re Imagining Political Community Studies In Cosmopolitan Democracy:

Re-imagining Political Community Daniele Archibugi, David Held, Martin Köhler, 1998 Understanding world politics today means acknowledging that the state is no longer the only actor in international relations The interstate system is increasingly challenged by new transnational forces and institutions multinational companies cross border coalitions of social interest groups globally oriented media and a growing number of international agencies These forces increasingly influence interstate decisions and set the agenda of world politics Though these phenomena have been discussed in the recent literature of international relations little attention has been given to their impact on political life within and between communities This book aims to explore the changing meaning of political community in a world of regional and global social and economic relations The authors of the essays in this volume who reflect a variety of academic disciplines reconsider some of the key terms of political association such as legitimacy sovereignty identity and citizenship Their common approach is to generate an innovative account of what democracy means today and how it can be reconceptualized to include subnational as well as transnational levels of political organization Inspired by Immanuel Kant's cosmopolitan principles the authors conclude that favorable conditions exist for a further development of democracy locally nationally regionally and globally

The Future of Political Community Gideon Baker, Jens Bartelson, 2009-12-04 This book explores the alternative futures of political community and moves beyond the critique of what is wrong with existing state based forms of political community It does so not with the defence of a particular normative model of political community in mind but rather in the quest for new ways of thinking about political community itself Exploring how the political must be rethought in the twenty first century and beyond this book is divided into three parts Part I focuses on the core problem that despite the obvious need to rethink political community beyond the nation state our conceptual language is still thoroughly shaped by modernity its prioritisation of the state and sovereignty and its assumption of unifying progress in history Part II focuses on postmodern political community these chapters take up the calls made above for new thinking about political community that goes beyond modern conceptions Part III turns to the question of the emergence and decline of new forms of political community The purpose of this section is to consider how the transformation of political community occurs in practice and what the primary driver of this change is globally locally and historically This book will be of strong interest to students and scholars of International Relations Political and Social Theory

new ways on subjects of slavery and memory global transformations and vernacular and vernacular modernity imperial imperatives and nationalist knowledge cosmopolitan politics and liberal democracy and governmental effects and everyday affects It is in these ways that the volume attempts to unravel the enchantments of modernity in order to approach anew modernity's constitutive terms formative limits and particular possibilities

Handbook of Globalization, Governance, and Public Administration Ali Farazmand, Jack Pinkowski, 2006-07-25 Globalization transcends borders and cultures as it develops both from the natural flow of information and communication technologies and as a directed and driven quest for global hegemony by self serving corporations and world political heavyweights It bears a multifaceted web of influence that manifests in inequalities in growth prosperity and

Perspectives on Contemporary Pakistan Ghulam Ali, Ejaz Hussain, 2020-06-09 This book analyses problems of governance development and environment affecting contemporary Pakistan issues that lie at the centre of federal and provincial policy deliberations formulation and implementation The book offers a comprehensive assessment of the policies or lack thereof Authors from a variety of disciplines empirically and conceptually evaluate latest developments events and data regarding law and order economic under performance social intolerance and climate crisis The book offers varied perspectives on state sovereignty civil military

relations spousal violence rural development CPEC nuclear governance and transboundary climate risk Arguing that the conclusions should be adopted by the social political and economic stakeholders of Pakistan as well as the region at the higher level of governability the book demonstrates that it would both boost national morale and inspire individuals to further investigate to come up with innovative solutions Examining some of the most pressing and persistent problems Pakistan and South Asia is facing the book will be of interest to academics working in the fields of Political Science in particular South Asian Politics Development Studies and Environmental Studies Citizenship in a Global Age Gerard Delanty, 2000-12-16 What is citizenship Is global citizenship possible Can cosmopolitanism provide an alternative to globalization Citizenship in a Global Age provides a comprehensive and concise overview of the main debates on citizenship and the implications of globalization It argues that citizenship is no longer defined by nationality and the nation state but has become de territorialized and fragmented into the separate discourses of rights participation responsibility and identity Gerard Delanty claims that cosmopolitanism is increasingly becoming a significant force in the global world due to new expressions of cultural identity civic ties human rights technological innovations ecological sustainability and political mobilization Citizenship is no longer exclusively about the struggle for social equality but has become a major site of battles over cultural identity and demands for the recognition of group difference Delanty argues that globalization both threatens and supports cosmopolitan citizenship Critical of the prospects for a global civil society he defends the alternative idea of a more limited cosmopolitan public sphere as a basis for new kinds of citizenship that have emerged in a global age Global Citizenship Education ,2008-01-01 The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates unequal power relations or cause new inequalities The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic tribal and nationalist rivalries problems of increasing international migration and asylum growing regional imbalances and increasing world inequalities Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government Many of the contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order

where the rights of the individual and of cultural groups irrespective of race gender ethnicity or creed are observed preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be tempted to call global civil society

Self-Evident Truths? Kate E. Tunstall, 2012-09-06 The keywords of the Enlightenment freedom tolerance rights equality are today heard everywhere and they are used to endorse a wide range of positions some of which are in perfect contradiction While Orwell's 1984 claims that there is one phrase in the English language that resists translation into Newspeak namely the opening lines of that key Enlightenment text the Declaration of Independence We hold these truths to be self evident that all men are created equal we also find the Wall Street Journal saying of the Iraq War that the US was fighting for the very notion of the Enlightenment It seems we are no longer sure whether these truths are self evident nor quite what they might mean today Based on the critically acclaimed Oxford Amnesty Lectures series this book brings together a number of major international figures to debate the history of freedom tolerance equality and to explore the complex legacy of the Enlightenment for human rights The lectures are published here with responses from other leading figures in the field

Globalisation and Citizenship Wayne Hudson, Steven Slaughter, 2007-04-11 This wide ranging volume explores the impact of globalization upon citizenship with a special focus on the transnational challenges that globalization poses While there is much debate over the concept globalization implies at least two distinct phenomena First it suggests that political economic and social activities are becoming increasingly inter regional or intercontinental in scope Secondly it suggests that there has been an intensification of levels of interaction and interconnectedness between states and societies Citizenship as one of the foundational concepts of the modern liberal democratic states provides the normative framework within which globalization debates may be understood and evaluated It also examines how different concepts theories and practices of citizenship are evolving in response to globalization Central questions explored in this text are How does globalization challenge traditional conceptions of citizenship in specific respects How is globalization creating new citizenships or new civil society spaces How is transnational citizenship developing and what problems are associated with it in specific areas Discussing the theoretical and practical prospects for new forms of liberal republican and cosmopolitan citizenship *Globalisation and Citizenship* will appeal to students and scholars in the fields of international relations globalization sociology and political science
