of the Unconscious: Integrating Brain and Mind in Psychotherapy (Norton Series on Interpersonal Neurobiology) Efrat Ginot,2015-06-08 A scientific take on the still central therapeutic concept of the unconscious More than one hundred years after Freud began publishing some of his seminal theories the concept of the unconscious still occupies a central position in many theoretical frameworks and clinical approaches When trying to understand clients internal and interpersonal struggles it is almost inconceivable not to look for unconscious motivation conflicts and relational patterns Clinicians also consider it a breakthrough to recognize how our own unconscious patterns have interacted with those of our clients Although clinicians use concepts such as the unconscious and dissociation in actuality many do not take into account

the newly emerging neuropsychological attributes of nonconscious processes As a result assumptions and lack of clarity overtake information that can become central in our clinical work This revolutionary book presents a new model of the unconscious one that is continuing to emerge from the integration of neuropsychological research with clinical experience Drawing from clinical observations of specific therapeutic cases affect theory research into cognitive neuroscience and neuropsychological findings the book presents an expanded picture of nonconscious processes The model moves from a focus on dissociated affects behaviors memories and the fantasies that are unconsciously created to viewing unconscious as giving expression to whole patterns of feeling thinking and behaving patterns that are so integrated and entrenched as to make them our personality traits Topics covered include the centrality of subcortical regions automaticity repetition and biased memory systems role of the amygdala and its sensitivity to fears in shaping and coloring unconscious self systems self narratives therapeutic enactments therapeutic resistance defensive systems and narcissism therapeutic approaches designed to utilize some of the new understandings regarding unconscious processes and their interaction with higher level conscious ones embedded in the prefrontal cortex

Through Windows of Opportunity Marianne Bentzen, Susan Hart, 2018-04-27 Research has shown that nonspecific factors such as relationship and personality have a stronger correlation to outcome than method The basic argument of *Through Windows of Opportunity* is that skilled psychotherapists do similar things while describing them differently and that psychological healing is created in the context of relationship This book presents the work of four therapists Peter Levine from the USA working with Somatic Experiencing on trauma states Jukka Makela from Finland with Theraplay working with disorganized attachment Haldor Ovreide from Norway with a therapeutic conversation in a disrupted son mother dyad and Eia Asen from the London Marlborough Clinic with systemic and mentalization based family therapy working on a dependent attachment pattern The closing chapters of the book summarize the high points of the discussions among the four therapists about nonspecific but shared aspects of their

Treating Attachment Pathology Jon Mills,2005-03-25 This book rectifies a much neglected area in the conceptualization and treatment of attachment disorders The interface between attachment psychic structure and character pathology has been largely ignored in the clinical literature until recent years and when discussed it has been generally relegated to the domain of child psychopathology Because human attachment is such a basic aspect to motivation and adjustment attachment disruptions in childhood color psychic development and often leave deep and enduring deficits in personality and adaptive functioning The author shows that patients with attachment deficiencies and associated characterological vulnerabilities have fundamental structural deficits in personality organization that lie at the heart of our current understanding of disorders of the self Offering the first comprehensive paradigm on the psychoanalytic treatment of adult and adolescent attachment disorders Jon Mills argues that attachment pathology is a disorder of the self based on developmental trauma that predisposes patients toward a future trajectory marked by structural deficits character pathology and interpersonal discord that fuel and sustain myriad forms of clinical symptomatology This pivotal work constitutes a treatise on the governing psychic processes of attachment on self organization adaptation and conflicted intersubjective dynamics in non childhood populations and on the intervening relational parameters in treating their emergent clinical pathologies Through conceptually astute technical strategies grounded in solid clinical practice the author offers one of the most extensive and original frameworks in the psychoanalytic treatment of attachment disorders **Yoga Therapy** Ellen G.
