obtain market acceptance Two of these challenges are vehicle range and production costs The aim of the INCOBAT project October 2013 December 2016 was to provide innovative and cost efficient battery management systems for next generation HV batteries INCOBAT presents a platform concept that achieves cost reduction reduced complexity increased reliability and flexibility while at the same time reaching higher energy efficiency Advantages of this approach include Tight control of the cell function leading to a significant increase of the driving range of the FEV Radical cost reduction of the battery management system with respect to current solutions Development of modular concepts for system architecture and partitioning safety security reliability as well as verification and validation thus enabling efficient integration into different vehicle platforms The INCOBAT project focused on the following twelve technical innovations grouped into four innovation groups which are summarized in this book Customer needs and integration aspects Transversal innovation Technology innovation

Platonopolis Dominic J. O'Meara, 2003-05 Conventional wisdom suggests that the Platonist philosophers of Late Antiquity from Plotinus third century to the sixth century schools in Athens and Alexandria neglected the political dimension of their Platonic heritage in their concentration on an otherworldly life Dominic O Meara presents a revelatory reappraisal of these thinkers arguing that their otherworldliness involved rather than excluded political ideas and he proposes for the first time a reconstruction of their political philosophy their conception of the function structure and contents of political science and its relation to political virtue and to the divinization of soul and state Among the topics discussed by O Meara are philosopher kings and queens political goals and levels of reform law constitutions justice and penology the political function of religion and the limits of political science and action He also explores various reactions to these political ideas in the works of Christian and Islamic writers in particular Eusebius Augustine Pseudo Dionysius and al Farabi Filling a major gap in our understanding Platonopolis will be of substantial interest to scholars and students of ancient philosophy classicists and historians of political thought

High Entropy Alloys Saurabh S. Nene, 2024-09-30 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary for example climate planetary and evolution sciences Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make the advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content
