*Reading the Canon* Philipp Löffler, 2017-03-02 Reading the Canon explores the relation between the production of literary value and the problem of periodization tracing how literary tastes particular reader communities and sites of literary learning shape the organization of literature in historical perspective Rather than suggesting a political critique of the canon this book shows that the production of literary relevance and its tacit hierarchies of value are necessary consequences of how reading and writing are organized as social practices within different fields of literary activity Reading the Canon offers a comprehensive theoretical account of the conundrums still defining contemporary debates about literary value the book also features a series of historically inflected author studies from classics such as Shakespeare and Thomas Pynchon to less likely figures such as John Neal and Owen Johnson that illustrate how the idea of literary relevance has been appropriated throughout history and across a variety of national and transnational literary institutions

Postcolonial Literatures in English Anke Bartels, Lars Eckstein, Nicole Waller, Dirk Wiemann, 2019-04-27 The term postcolonial literatures in English designates English language literatures from Africa Asia the Americas and Oceania as well as the literatures of diasporic communities who have moved from those regions to the global north This volume introduces the central themes of postcolonial literary studies and delineates how these themes are reflected and elaborated in exemplary literary works by postcolonial authors from around the world It also offers succinct definitions of key terms like Orientalism hybridity Indigeneity or writing back

**Sex and Race, Volume 1** J. A. Rogers, 2014-09-15 In the Sex and Race series first published in the 1940s historian Joel Augustus Rogers questioned the concept of race the origins of racial differentiation and the root of the color problem Rogers surmised that a large percentage

of ethnic differences are the result of sociological factors and in these volumes he gathered what he called the bran of history the uncollected unexamined history of black people in the hope that these neglected parts of history would become part of the mainstream body of Western history Drawing on a vast amount of research Rogers was attempting to point out the absurdity of racial divisions Indeed his belief in one race humanity precluded the idea of several different ethnic races The series marshals the data he had collected as evidence to prove his underlying humanistic thesis that people were one large family without racial boundaries Self trained and self published Rogers and his work were immensely popular and influential during his day even cited by Malcolm X The books are presented here in their original editions *Time Briton*
