Ingarden's analysis of the intentional structures of works of art offers in its distinct and clear cut forms an objective correlate as well as a point of reference to the vast conundrum of issues concerning the creative endeavor of the writer poet artist in their struggle to endow life with its specifically human significance a conundrum that in our research we are trying to disentangle elucidating its mysterious ramifications their sources and dynamic virtualities As a matter of fact Ingarden's thought newly interpreted and originally expanded occupies a legitimate place in the present collection We find here in the first place an original expansion of Ingarden's aesthetic theory in the monograph of Iadwiga Smith followed by the essays of Władysław Osadnik Yushiro Takei and Charles Rzepka
