Allington, 2010-09-17 Bringing together a wide range of research on reading disabilities this comprehensive Handbook extends current discussion and thinking beyond a narrowly defined psychometric perspective. Emphasizing that learning to read proficiently is a long term developmental process involving many interventions of various kinds all keyed to individual developmental needs it addresses traditional questions: What is the nature or causes of reading disabilities? How are reading disabilities assessed? How should reading disabilities be remediated? To what extent is remediation possible but from multiple or alternative perspectives? Taking incursions into the broader research literature represented by linguistic and anthropological paradigms as well as psychological and educational research the volume is on the front line in exploring the relation of reading disability to learning and language to poverty and prejudice and to instruction and schooling. The editors and authors are distinguished scholars with extensive research experience and publication records and numerous honors and awards from professional organizations representing the range of disciplines in the field of reading disabilities. Throughout their contributions are contextualized within the framework of educators struggling to develop concrete instructional practices that meet the learning needs of the lowest achieving readers.

This book explains the rationale behind these interventions and discusses the evidence supporting them. Clear advice is given in plain English to those wondering if these interventions will be helpful. *Vision, Reading Difficulties and Visual Stress* 2nd Edition draws together disparate research findings in a range of neurological disorders where vision is compromised by cortical hyperexcitability. *Dyslexia and Hyperlexia* P. G. Aaron, 1989-03-31 Even though I had been studying reading problems in children for a number of years as a means of understanding cognitive processes I became deeply committed to the study of developmental dyslexia after my encounter with S H a dyslexic college student Until then dyslexia to me remained an interesting phenomenon but somewhat removed from the mainstream of my research interests The facts that in spite of his superior IQ S H could read no better than a child in the fifth grade and misspelled even common words such as was and here however took me by surprise and made me appreciate the intriguing and challenging nature of developmental dyslexia This led to a series of studies of college students with reading disability a group that is relatively unexplored The general plan of these investigations was to study a small number of disabled readers at any given time rather intensively Even though this approach limits the generalizability of the research findings it lays bare some of the most interesting facts about dyslexia which are obscured in large scale statistical studies These studies have now extended well over a decade and are still continuing As soon as these studies were started it became obvious that not all reading disabled college students are alike and that disabled readers could be classified into three broad categories those with poor decoding skill those with poor comprehension ability and those with a combination of these two deficits

**Can We Read Letters?** Finn Egil Tønnessen, Per Henning Uppstad, 2015-02-27 In their new book Finn Egil Tønnessen and Per Henning Uppstad provide a set of theoretical and philosophical reflections on research in reading and dyslexia It is a pleasure to welcome this book which reflects the many contributions made by researchers at the National Centre for Reading Education and Research in Stavanger Norway Professor Usha Goswami University of Cambridge Careful reflection on the

concepts and methods used is a prerequisite for further development in any field of research The authors think cognitive psychology has become too dominant in reading and dyslexia research arguing that it should be combined with behaviourism and connectionism in part by focusing on the concept of skill The key components of a skill are claimed to be automaticity awareness and shifts between them Reading is defined as an interpretative skill which should be viewed from the perspective of hermeneutics The authors use these fundamental analyses and definitions to shed new light on the balanced approach to reading instruction reading fluency and other key concepts The book also deals with problems in the definition of dyslexia and proposes a method to arrive at clear and fruitful definitions It concludes with a chapter trying to answer the question of in what sense or to what extent it can be claimed that reading and dyslexia research has made progress The book mainly builds on articles published over the past 25 years by Professor Finn Egil T nnessen at the National Centre for Reading Education and Research Stavanger Norway

*School Success for Kids With Dyslexia and Other Reading Difficulties* Walter Dunson, 2021-10-10 School Success for Kids With Dyslexia and Other Reading Difficulties provides parents and teachers with goals that will meet the needs of students who are struggling with reading leading them to work through their difficulties and enjoy reading It includes information assessments and techniques that parents teachers and school administrators can use immediately to foster reading success Through an understanding of how English words are constructed how the brain processes language and the differences that exist between learning styles parents and teachers will gain keen insight into the processes of reading reading acquisition and reading instruction The book also covers topics such as how language skills can affect reading difficulties and how technology can be used to help students and it provides a structured approach for parents to implement at home to help their struggling students find success

*Overcoming Dyslexia* Sally E. Shaywitz, 2003 Draws on recent scientific breakthroughs to explain the mechanisms underlying dyslexia offering parents age specific grade by grade instructions on how to help their children
