Handbook of Children's Literacy Terezinha Nunes, Peter Bryant, 2003-12-31 PETER BRYANT TEREZINHA NUNES The time that it takes children to learn to read varies greatly between different orthographies as the chapter by Sprenger Charolles clearly shows and so do the difficulties that they encounter in learning about their own orthography Nevertheless most people who have the chance to learn to read do in the end read well enough even though a large number experience some significant difficulties on the way Most of them eventually become reasonably efficient spellers too even though they go on make spelling mistakes at any rate if they are English speakers for the rest of their lives So the majority of humans plainly does have intellectual resources that are needed for reading and writing but it does not always find these resources easy to marshal What are these resources Do any of them have to be acquired Do different orthographies make quite different demands on the intellect Do people differ significantly from each other in the strength and accessibility of these resources If they do are these differences an important factor in determining children's success in learning to read and write These are the main questions that the different chapters in this section on Basic Processes set out to answer

Edinburgh History of Children's Periodicals Michelle J. Smith, Beth Rodgers, Kristine Moruzi, 2024-04-30. Since the publication of the first children's periodical in the 1750s, magazines have been an affordable and accessible way for children to read and form virtual communities. Despite the range of children's periodicals that exist, they have not been studied to the same extent as children's literature. *The Edinburgh History of Children's Periodicals* marks the first major history of magazines for young people from the mid-eighteenth century to the present. Bringing together periodicals from Britain, Ireland, North America, Australia, New Zealand, and India, this book explores the roles of gender, race, and national identity in the construction of children as readers and writers. It provides new insights both into how child readers shaped the magazines they read and how magazines have encouraged children to view themselves as political and world subjects.

How Children Develop Robert S. Siegler, Judy S. DeLoache, Nancy Eisenberg, 2006. In its first edition, this highly anticipated textbook for the topically organized child development course provided a fresh, non-encyclopedic approach, offering the latest straight from the research understanding of child development without overwhelming the student with inessential detail. The new edition brings those hallmark features forward again, providing a thoroughly contemporary, streamlined introduction to the study of child development that emphasizes fundamental principles, enduring themes, and important recent studies. Student-friendly pedagogy, a new chapter on gender, and an enhanced media and supplements package further enrich this accessible, engaging, and informative text.
