Science And The Sacred:

Science and the Sacred Ravi Ravindra, 2000 Science and the Sacred Ravi Ravindra, 2014-06-25 Einstein said the best scientists have always approached science as a sacred activity that could yield the secrets of the Old One Ravi Ravindra points out This eloquent book at once affirms scientific exploration and addresses the failure of science to deal with the inner life We all want to know why things happen and how we can control certain outcomes but we also rightly wonder about meaning and purpose Does the earth need people What about me personally What is my place Why am I here Coming from the East this Western physicist offers a rare hybrid view on such topics as Perception in yoga and physics The moral responsibility of scientific power Science as a spiritual path Healing the soul truth love and God Each of us is an artist of our own life Ravindra says Starting from the raw material of our self we sculpt something which corresponds to our aspirations our understanding our skill and sensitivity This work of transformation is an imperative of our human existence **Science is a Sacred Cow** Anthony Standen, 1950 From jacket Scientists believe they possess in unique degree the qualities of accuracy observation reasoning power intellectual curiosity tolerance and even humility They suppose these admirable qualities can best be imparted to other people by giving them courses in science *The Need For a Sacred Science* Seyyed Hossein Nasr, 2005-08-12 The meaning of a science rooted in the sacred its contrast to modern science and its pertinence to us today Reinventing the Sacred Stuart A. Schwartz, 2011-01-11 The Sacred Promise offers scientific proof of Spirit's existence be it the deceased angels or spirit guides and shows Spirit's willingness and promise to offer guidance and help with the challenges of day to day living Sacred Promise brings us into the laboratory of scientist Dr Gary Schwartz where he establishes the existence of Spirit by its own Willful Intent a proof of concept for deceased spirits The author takes readers on a personal journey into the world of angels and spirits and reveals their existence and desire to help Dr Schwartz candidly discusses the challenges as well as the rewards of connecting with Spirit He poses several important questions What if our feelings of emptiness loneliness hopelessness and meaninglessness are actually fostered by our belief in a spiritless Universe What if our physical hunger is symptomatic of a greater spiritual hunger What if Spirit is actually all around us ready to fill us with energy hope and direction if we are ready to ingest it What if Spirit is like air and water readily available for us to draw within that is if we choose to seek it Sacred Promise shows how we can attune ourselves and receive this guidance from Spirit which is all scientifically documented by Dr Schwartz experiments and research Prepare to suspend your beliefs about Spirit Science and Religion in a Post Colonial World Zainal Abidin Bagir, 2005 This book addresses selected issues in the emerging field of science and religion and at the same time acknowledges the situation of Indonesia or more generally a Third World country as the locus for this discussion The

book is concerned with how various world religions in particular Islam and Christianity respond to shared challenges posed by science as new theories in cosmology physics and the life sciences have brought challenges to many traditional religious ideas There are also more generally epistemological challenges that reflect the recent success of natural science as a mode of inquiry These are felt as problems in both the Western and non Western worlds but with an important difference While the Western world is considered the legitimate owner of modern science some in the Muslim world and the Third World more generally see modern science as a cultural alien imposed on them due to its initial introduction in the colonial period
