Literary Labyrinths in Franco-Era Barcelona Colleen P. Culleton,2016-07-22 Bringing together works by Salvador Espriu Juan Goytisolo Merc Rodoreda Esther Tusquets and Juan Marsa that portray memory as a disorienting narrative enterprise Colleen Culleton argues that the source of this disorientation is the material reality of life in Barcelona in the immediate post Civil War years Barcelona was the object of harsh persecution in the first years of the Franco regime that included the erasure of marks of Catalan identity and cultural history from the urban landscape and made Barcelona a

moving target for memory The literature and film she examines show characters struggling to produce narratives of the remembered past that immediately conflict with the dominant version of Spain's historical narrative formulated to legitimize the Civil War Culleton suggests the trope of the laberinto used as an image or device in all five of the works she considers and translated into English as both maze and labyrinth opens up a space that enables readers to take vulnerability to outside interference into account as an inseparable part of remembrance While the narratives all have maze like qualities involving a high level of reader participation and choice the exigencies of the labyrinth with its unicursal demands for patience perseverance and faith always prevail Thus do the Francoist narrative and social structure in the end resurface and reassert themselves over the narrating character's perspective

Labyrinth of

Thought José Ferreirós,2008-10-04 *Labyrinth of Thought* discusses the emergence and development of set theory and the

set theoretic approach to mathematics during the period 1850-1940. Rather than focusing on the pivotal figure of Georg Cantor, it analyzes his work and the emergence of transfinite set theory within the broader context of the rise of modern mathematics. The text has a tripartite structure. Part 1, *The Emergence of Sets within Mathematics*, surveys the initial motivations for a mathematical notion of a set within several branches of the discipline: geometry, algebra, algebraic number theory, real and complex analysis, emphasizing the role played by Riemann in fostering acceptance of the set theoretic approach. In Part 2, *Entering the Labyrinth*, attention turns to the earliest theories of sets, their evolution, and their reception by the mathematical community; prominent are the epoch-making contributions of Cantor and Dedekind and the complex interactions between them. Part 3, *In Search of an Axiom System*, studies the four-decade period from the discovery of set theoretic paradoxes to Gödel's independence results, an era during which set theory gradually became assimilated into mainstream mathematics; particular attention is given to the interactions between axiomatic set theory and modern systems of formal logic, especially the interplay between set theory and type theory. A new Epilogue for this second edition offers further reflections on the foundations of set theory, including the dichotomy conception and the well-known iterative conception.

Labyrinth of Thought José Ferreiros, 2001-11-01 José Ferreiros has written a magisterial account of the history of set theory, which is panoramic, balanced, and engaging. Not only does this book synthesize much previous work and provide fresh insights and points of view, but it also features a major innovation: a full-fledged treatment of the emergence of the set theoretic approach in mathematics from the early nineteenth century. This takes up Part One of the book. Part Two analyzes the crucial developments in the last quarter of the nineteenth century, above all the work of Cantor, but also Dedekind and the interaction between the two. Lastly, Part Three details the development of set theory up to 1950, taking account of foundational questions and the emergence of the modern axiomatization. *Bulletin of Symbolic Logic*
