Lost In Sound:

A Summary of Researches in Sound Joseph Henry, 1879 **Lost in Music** Avron Levine White, 2016-04-14 This collection of essays first published in 1987 provides a sociological treatment of many musical forms rock jazz classical with special emphasis on the perspective of the practising musician Among the topics covered are the legal structures governing musical production and the question of copyright recording and production technology the social character of musical style and the impact of lyrical content considered socially and historically The Conservator , 1908 *Lost Sound* Jeff Porter, 2016-03-11 From Archibald MacLeish to David Sedaris radio storytelling has long borrowed from the world of literature yet the narrative radio work of well known writers and others is a story that has not been told before And when the literary aspects of specific programs such as The War of the Worlds or Sorry Wrong Number were considered scrutiny was superficial In *Lost Sound* Jeff Porter examines the vital interplay between acoustic techniques and modernist practices in the growth of radio Concentrating on the 1930s through the 1970s but also speaking to the rising popularity of today s narrative broadcasts such as This American Life Radiolab Serial and The Organist Porter s close readings of key radio programs show how writers adapted literary techniques to an acoustic medium with great effect Addressing avant garde sound poetry and experimental literature on the air alongside industry policy and network economics Porter identifies the ways radio challenged the conventional distinctions between highbrow and lowbrow cultural content to produce a dynamic popular culture Mindfulness in Sound Mark Tanner, 2020-05-05 Our world is brimming with sound from the detonation of distant thunder to the drip drip drip of a rusty drainpipe Once we ve been shown how to listen more attentively and creatively we can access a deeper more lasting meditation Our thoughts dreams and daydreams might be carried along a stream of birdsong or punctuated by a rush of unexpected laughter Learning about sound where how and why it comes into being is learning about the world itself In *Mindfulness in Sound* Mark Tanner encourages us to consider afresh the origins of resonance and the wider impact of natural sound in our daily lives Through simple meditations he shows us how we can become more receptive to a hinterland of beautiful as well as challenging noise and tune into the soundtrack of our own imagination As we consider the nature of sound and the sound of nature we will find ourselves connected more vibrantly to the world we live in and to a more sustainable inner peace Heidegger and Music Casey Rentmeester, Jeff R.
