Onomastics of the "Chanson de Roland" Gustav A. Beckmann, 2023-03-06 This ambitious study of all proper names in the Chanson de Roland is based for the first time on a systematic survey of the whole geographical and historical literature from antiquity to after 1100 for the Geographica and on working through almost the entire documentary tradition of France and its neighbouring regions from 778 to the early 12th century for the personal names The overall result is clear the surviving song is more tightly and profoundly structured even in smaller scenes than generally assumed it is also richer in depicting reality and it has a very long prehistory which can be traced in outline albeit with decreasing certainty almost back to the Frankish defeat of 778 Here are some individual results for the first time a detailed and ultimately simple explanation not only of the pagan catalogue of peoples but also of the overarching structure of Baligant's empire the organisation of North Africa the corpus of the Twelve Anti Pairs as well as the pagan gods are given and individual names such as Bramimunde and Jurfaret toponyms such as Marbrise and Marbrose are explained From Roland's Spanish conquests v 196 200 the course of the elapsed set anz toz pleins is reconstructed Even the names of the weapons prove to be a small structured group in that they are very discreetly adapted to their respective pagan or Christian owner On the Christian side the small list of relics in Roland's sword is also carefully devised not least in what is left out a relic of the Lord this is reserved for Charlemagne's Joise The author explains for example why from the archangel triad only Michael and Gabriel descend to the dying Roland whereas the angel Cherubin descends in Rafael's place Munjoie requires extensive discussion because here a hitherto insufficiently recorded toponym has been secondarily charged by the poet with traditional theological associations The term Ter e major is attested for the first time in reality namely in the late 11th century in Norman usage For the core of France the fourth cornerstone along with Besan on Wissant and Mont Saint Michel is Xanten and its centre is Aachen The poet's artful equilibration of Charles's ten eschieles and their leaders is traced The Capetian barrier emerges as a basic fact of epic geography Approximately the last quarter of the study is devoted to the prehistory of the song going backwards in time still quite clearly visible is an Angevin Song of Roland from around 1050 in which Marsil e Olivier Roland Ganelon Turpin and Naimes already have roles similar to those in the preserved Song Behind it between about 970 and shortly after 1000 is the Girart de Vienne from the Middle Rhine already recognised by Aebischer with the newly invented Olivier contra Roland Finally in faint outlines an oldest attainable also Middle Rhine adaptation of the Roland material from shortly after 870 emerges For the Chanson de Roland Gaston Paris and Joseph Bédier were thus each right on the main point that was close to their hearts the surviving song has both the thoroughly sophisticated structure of great art that Bédier recognised in it and the imposingly long prehistory that Paris conjectured

David Trotter, 2015-09-14 Textual editing especially for the Middle Ages is the starting point for a good deal of what is done in historical linguistics. Editorial methods have an importance going far beyond theoretical considerations and are of interest to scholars over and above those who edit texts. The aim of this volume is to present both the range of methods used together with a number of case studies accompanied by studies which discuss related aspects of textual editing such as glossaries or reviews of editions. The aim is to summarize modern editorial practices whilst not losing sight of their origins. Thus the book will outline the tradition of the critical edition, the so-called Lachmannian edition which survives particularly in Italy, the more British method which dominates in France and electronic editions which can expand the concept of editing to include links to digitized manuscripts. Attention is also given to editorial instructions and to the use of variants in stemmatology with an excursus to the seventeenth century where modernisation continues to be practised. Finally the volume will also discuss two difficult cases: the editing of Old French and Occitan texts in Hebrew characters. *Le Paysage monumental de la France*

Il volume è suddiviso in tre sezioni: l'italiano nella storia, l'italiano contemporaneo, i luoghi della codificazione. Le questioni e gli sviluppi recenti della ricerca. Nella seconda sezione un capitolo sull'italiano di oggi illustra i tratti più significativi della lingua che cambia e si tratta la morfologia con la formazione delle parole, mentre molto articolata la parte dedicata all'italiano variazionale, la cui architettura più complessa rispetto a pochi decenni fa, dà il quadro sociolinguistico notevolmente mutato e l'influsso significativo dei media anche sui fatti di lingua. Alcuni settori hanno avuto inoltre un incremento notevole di studio: la pragmatica, la linguistica testuale, la linguistica dei corpora come del resto anche la didattica dell'italiano che si consolida anche nella prospettiva
