Near The Mountains By Bruchac Joseph:

Way of the Earth T.c. Mcluhan,1995-07 This book draws upon both ancient and contemporary sources to examine the significance of the earth from the perspective of six different cultures and how these spiritual traditions have valued perceived and understood the earth At first glance the peoples of aboriginal Australia Japan Greece Africa South America and Native North America couldn't be more different But by taking a closer look the author shows that there are many more similarities than differences all revere mountains as a source of inspiration and holiness all feel a spiritual connection to the soil itself all create art and literature to celebrate their connection to the land and all see themselves as inextricable from the land they call home This unique volume explores how human beings across the planet and across time have felt about the earth and nature and how they have understood it related to it and celebrated it in their literature mythology religion and art It demonstrates that no matter where on the planet we exist and no matter what time period we live we all have a profound connection to the earth from Book Jacket

Skylark Meets Meadowlark Thomas C. Gannon,2009-11-01 A Native rereading of both British Romanticism and mainstream Euro American ecocriticism this cross cultural transatlantic study of literary imaginings about birds sets the agenda for a more sophisticated and nuanced ecocriticism Lakota critic Thomas C Gannon explores how poets and nature writers in Britain and Native America have incorporated birds into their writings He discerns an evolution in humankind's representations and attitudes toward other species by examining the avian images and tropes in British Romantic and Native American literatures and by considering how such literary treatment succeeds from an ecological or animal rights perspective Such depictions Gannon argues reveal much about underlying cultural and historical relationships with the Other whether other species or other peoples He elucidates the changing interconnections between birds and humans in British Romanticism from Cowper to Clare with particular attention to Wordsworth Coleridge Shelley Byron and Keats Gannon then considers how birds are imagined by Native writers including early Lakota authors and contemporary poets such as Linda Hogan and Joy Harjo Ultimately he shows how the sensitive and far reaching connections with nature forged by Native American writers encourage a more holistic reimagining of humankind's relationship to other animals

Scott Bryson, 2005-04-01 In contrast to nature poets of the past who tended more toward the bucolic and pastoral many contemporary nature poets are taking up radical environmental and ecological themes In the last few years interesting and evocative work that examines this poetry has begun to lay the foundation for studies in ecopoetics Informed in general by current thinking in environmental theory and specifically by the work of cultural geographer Yi Fu Tuan *The West Side of Any Mountain* participates in and furthers this scholarly attention by offering an overarching theoretical framework with which to approach the field One area that contemporary theorists have found problematic is the dualistic civilization wilderness binary that focuses on the divisions between culture and nature thereby increasing the modern sense of alienation Tuan's place space framework offers a succinct vocabulary for describing the attitudes of ecological poets and other nature writers in a way that avoids setting up an adversarial relationship between place and space Scott Bryson describes the Tuanian framework and employs it to offer fresh readings of the work of four major ecopoets Wendell Berry Joy Harjo Mary Oliver and W S Merwin *The West Side of Any Mountain* will be of great interest to scholars and teachers working in the field of contemporary nature poetry It is recommended for nature writing courses as well as classes dealing with 20th century poetry contemporary literary criticism and environmental theory **Appalachian Children's Literature**, 2010-04-13 This comprehensive bibliography includes books written about or set in Appalachia from the 18th century to the present Titles represent the entire region as defined by the Appalachian Regional Commission including portions of 13 states stretching from southern New York to northern Mississippi The bibliography is arranged in alphabetical order by author and each title is accompanied by an annotation most of which include composite reviews and critical analyses of the work All classic genres of children's literature are represented *Native North Americans in Literature for Youth* Alice Crosetto, Rajinder Garcha, 2013-09-12 Native North Americans have rich and diverse cultures and traditions However many misconceptions prejudices and stereotypes exist due to the lack of understanding and ignorance of these cultures It is important that children and adolescents learn about and appreciate the invaluable contributions that North American Native groups have made to American society Equally important is the availability of resources that accurately and objectively portray the historical events that occurred when European settlers displaced thousands of Native North Americans from their ancestral

most notably the committed literature of the 1960s and our own present. In mapping out these geographically and artistically diverse traditions including case studies from the Americas, Europe, Africa, India, and Russia, contributors advance critical discussions in the field, making questions pertaining to politicized art newly compelling to a broader and more diverse readership. Most importantly, this volume insists on the need to think about literature's political uses today at a time when it has become increasingly difficult to imagine any kind of political efficacy for art, even as the need to do so is growing more and more acute. Literature may not proffer easy answers to our political problems, but as this collection suggests, the writing of the 20th century holds out aesthetic resources for a renewed engagement with the dilemmas that face us now.

American Indian Resource Manual for Public Libraries Frances De Usabel, 1992 Varmints and Victims Frank Van Nuys, 2015-11-09

It used to be: If you see a coyote, shoot it. Better yet, a bear. Best of all, perhaps, a wolf. How we've gotten from there to here, where such predators are reintroduced, protected, and in some cases revered, is the story Frank Van Nuys tells in *Varmints and Victims*, a thorough and enlightening look at the evolution of predator management in the American West. As controversies over predator control rage on, *Varmints and Victims* puts the debate into historical context, tracing the West's relationship with charismatic predators like grizzlies, wolves, and cougars from unquestioned eradication to ambivalent recovery efforts. Van Nuys offers a nuanced and balanced perspective on an often emotional topic, exploring the intricacies of how and why attitudes toward predators have changed over the years. Focusing primarily on wolves, coyotes, mountain lions, and grizzly bears, he charts the logic and methods of management practiced by ranchers, hunters, and federal officials. Broad in scope and rich in detail, this work brings new, much-needed clarity to the complex interweaving of economics, politics, science, and culture in the formulation of ideas about predator species and in policies directed at these creatures. In the process, we come to see how the story of predator control is in many ways the story of the American West itself, from early attempts to connect the frontier region to mainstream American life and economics to present ideas about the nature and singularity of the region.
