Bartlesville Energy Center Rodney P. Carlisle, August W. Giebelhaus, C & W Associates, 1985 *Dissent, Protest and Dispute in Africa* Toyin Falola, Emmanuel Mbah, 2016-12-19 This book provides unique and detailed perspectives on different aspects of dissent protest and disputes and how these have in turn continued to pose challenges in Africa The contributors argue that dissent protest and most forms of disputes in Africa are the result of daily challenges that its people have faced and continue to encounter to this day These challenges include amongst others demands for transparency good governance and accountability waves of instability that have created insecurity in most parts of the continent an unsustainable level of youth unemployment rapid population growth a continent wide healthcare and poverty crises and numerous environmental challenges The chapters elevate the debates on dissent protest and disputes conflict in Africa by adding new ideas and introducing new and useful interpretations The book's strength lies in the contributors ability to conflate colonial and postcolonial tendencies to show how challenges of the past are not so different from those of today while also presenting important historical issues from various scholarly perspectives *Dissent Protest and Dispute in Africa* will be of interest for students and scholars of African history politics and culture as well as those interested in social movements and civil society

Origins of the New South, 1877--1913 C. Vann Woodward, 1981-08 **Bless the Pure and Humble** Nicholas George Malavis, 1996 Nicholas George Malavis's well reasoned and sophisticated study of the development of petroleum regulation offers historical and legal analysis of the basic issues affecting property rights and the public interest and traces the legal moves that shaped a new regulatory system centered around the Texas Railroad Commission It provides a fascinating view of the multiple roles of lawyers in putting the new system in place as they worked for a variety of clients to resolve the serious conflicts plaguing the oil industry in its efforts to manage overproduction in the 1920s and 1930s Access to the internal records of Vinson and Elkins has allowed Malavis to provide readers a rare view inside the world of lawyer client relations He describes how prominent attorney James Elkins and others applied their legal talents negotiating skills and political influence to fight for solutions to the problems that would help define the parameters of the new prorating system **Historical Dictionary of the Petroleum Industry** Marius S. Vassiliou, 2018-06-20 The petroleum industry is unique it is an industry without which modern civilization would collapse Despite the advances in alternative energy petroleum's role is still central Petroleum still drives economics geopolitics and sometimes war The history of petroleum is to some measure the history of the modern world This book represents a concise but complete one volume reference on the history of the petroleum industry from pre modern times to the present day covering all aspects of business technology and geopolitics The book also presents an analysis of the future of petroleum and a highly useful set of statistical graphs Anyone interested in the history status and outlook for petroleum will find this book a uniquely valuable first place to look This new second edition incorporates all the revolutionary changes in the petroleum landscape since the first edition was published

including the boom in extraction of oil and gas from shale formations using techniques such as fracking and horizontal drilling This second edition of Historical Dictionary of the Petroleum Industry contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 500 cross referenced entries on companies people events technologies countries provinces cities and regions related to the history of the world s petroleum industry This book is an excellent resource for students researchers and anyone wanting to know more about the petroleum industry Energy Follies Robert R. Nordhaus, Sam Kalen, 2018-09-20 examines principal energy policy decisions and their lingering effects by recounting the historical context surrounding the interplay of law markets and technology **Kingdom** Jerome Tuccille, 2004-02 This is a reprint of a previously published work It deals with the life of H L Hunt the oil tycoon and his family **Petroleum Age** , 1924 The Second Conquest of Latin America Steven C. Topik, Allen Wells, 2010-02-01 Between 1850 and 1930 Latin America s integration into the world economy through the export of raw materials transformed the region This encounter was nearly as dramatic as the conquistadors epic confrontation with Native American civilizations centuries before An emphasis on foreign markets and capital replaced protectionism and self sufficiency as the hemisphere s guiding principles In many ways the means employed during this period to tie Latin America more closely to western Europe and North America resemble strategies currently in vogue Much can be learned from analyzing the first time that Latin Americans embraced export led growth This book focuses on the impact of three key export commodities coffee henequen and petroleum The authors concentrate on these rather than on national economies because they illustrate more concretely the interaction between the environment natural and human resources and the world economy By analyzing how different products spun complex webs of relationships with their respective markets the essays in this book illuminate the tensions and contradictions found in the often conflictive relationship between the local and the global between agency and the not so invisible hand Ultimately the contributors argue that the results of the second conquest were not one sided as Latin Americans and foreigners together forged a new economic order one riddled with contradictions that Latin America is still attempting to resolve today *A History of American Business* Keith L. Bryant, Henry C. Dethloff, 1990 A chronological topical survey of business history in America Designed as a core text
