Particularities Readings In George Eliot By Hardy Barbara Nathan:

The Age of Analogy Devin Griffiths, 2016-10-28 How did literature shape nineteenth century science Erasmus Darwin and his grandson Charles were the two most important evolutionary theorists of eighteenth and nineteenth century Britain Although their ideas and methods differed both Darwins were prolific and inventive writers Erasmus composed several epic poems and scientific treatises while Charles is renowned both for his collected journals now titled *The Voyage of the Beagle* and for his masterpiece *The Origin of Species* In *The Age of Analogy* Devin Griffiths argues that the Darwins writing style was profoundly influenced by the poets novelists and historians of their era The Darwins like other scientists of the time labored to refashion contemporary literary models into a new mode of narrative analysis that could address the contingent world disclosed by contemporary natural science By employing vivid language and experimenting with a variety of different genres these writers gave rise to a new relational study of antiquity or comparative historicism that emerged outside of traditional histories It flourished instead in literary forms like the realist novel and the elegy as well as in natural histories that explored the continuity between past and present forms of life Nurtured by imaginative cross disciplinary descriptions of the past from the historical fiction of Sir Walter Scott and George Eliot to the poetry of Alfred Tennyson this novel understanding of history fashioned new theories of natural transformation encouraged a fresh investment in social history and explained our intuition that environment shapes daily life Drawing on a wide range of archival evidence and contemporary models of scientific and literary networks *The Age of Analogy* explores the critical role analogies play within historical and scientific thinking Griffiths also presents readers with a new theory of analogy that emphasizes language s power to foster insight into nature and human society The first comparative treatment of the Darwins theories of history and their profound contribution to the study of both natural and human systems this book will fascinate students and scholars of nineteenth century British literature and the history of science **Particularities** Barbara Hardy, 1983 *Book Review*

the early novels *Oliver Twist* and *Nicholas Nickleby* are the most fully discussed with especial attention to Dickens insight into criminal psychology in the former In the later novels beginning with *Bleak House* Hardy finds a closer unity of theme and structure the result of the firmer grasp of social criticism which Dickens displays during the 1850 s and 1860 s There had been plenty of exposure of contemporary injustices and abuses in the earlier fiction but in the later the confrontation between rich and poor has become more urgent the comedy less carefree the comic and serious elements more closely blended In these later novels too Hardy notes an effort to bring the imagination more closely to bear upon the inner life of the principal characters Dickens does not attempt the kind of novel which is shaped by inner action as George Eliot and Henry James were to do he keeps an external focus on society but strives within this dimension for a fuller access to the inward conflicts of characters such as Edith in *Dombey and Son* and Pip in *Great Expectations* Barbara Hardy 1924 2016 was Professor of English at Birkbeck College University of London Her publications include *The Novels of George Eliot A Study in Form The Appropriate Form An Essay on the Novel Middlemarch Critical Approaches to the Novel Critical Essays on George Eliot The Moral Art of Dickens The Exposure of Luxury Radical Themes in Thackeray A Reading of Jane Austen Tellers and Listeners The Narrative Imagination and The Advantages of Lyric Particularities Readings in George Eliot* *The Novels of George Eliot* Barbara Hardy, 1981
