Photochemical and Photobiological Reviews Kendric C. Smith, 2013-06-29 The goals of the science of photobiology can be divided into four categories to develop 1 ways to optimize the beneficial effects of light on man and his environment 2 methods to protect organisms including man from the detrimental effects of light 3 photochemical tools for use in studies of life processes and 4 photochemical therapies in medicine To achieve these goals will require the knowledgeable collaboration of biologists chemists engineers mathematicians physicians and physicists because photobiology is a truly multidisciplinary science While a multidisciplinary science is more intellectually demanding it also has a greater potential for unexpected breakthroughs that can occur when data from several areas of science are integrated into new concepts for theoretical or practical use Photochemical and Photobiological Reviews continues to provide in depth coverage of the many specialty areas of photobiology It is hoped that these reviews will provide an important service to the younger scientists in the field and to senior scientists in related fields because they provide a ready access to the recent literature in the field and more importantly they frequently offer a critical evaluation of the direction that the field is taking or suggest a redirection when appropriate Since it is important that this review series remain responsive to the needs of photochemists and photobiologists the Editor would value comments and suggestions from its readers

Photochemical and Photobiological Reviews Kendric Smith, 2013-11-11 A stone carving from the 14th century B C records that the Egyptian pharaoh Akhenaten born Amenhotep IV and his wife Nefertiti recognized the importance of sunlight to life In fact Akhenaten initiated a monotheistic religion with Aton the sun as God One of his daughters became the wife of King Tut Ankhamon the spelling of whose name indicates a return to the old religion and an eclipse of interest in photobiology among the pharaohs A renewal of interest in photobiology in modern times was climaxed in 1928 by the establishment of an international organization for photobiology under the title Comité International de la Lumière C I L Its present title Comité International de Photobiologie C I P was adopted at a meeting in Paris in 1951 The first of a series of international congresses on photobiology was held in 1954 and probably represents the beginning of modern day photobiology Medical men were prominent in the activities of the old C I L for the importance of natural sunlight in human health and disease was obvious though not well understood The bringing together of physicians with physicists chemists and biologists from the pure and applied branches of their subjects was the aim of the older C I L and continues to the present day through the C I P
