Zervigon, 2014-11-20 Recent decades have seen a flourishing interest in and speculation about the origins of photography Spurred by rediscoveries of first photographs and proclamations of photography s death in the digital age scholars have been rethinking who and what invented the medium Photography and Its Origins reflects on this interest in photography s beginnings by reframing it in critical and specifically historiographical terms How and why do we write about the origins of the medium Whom or what do we rely on to construct those narratives What s at stake in choosing to tell stories of photography s genesis in one way or another And what kind of work can those stories do Edited by Tanya Sheehan and Andres Mario Zervig n this collection of 16 original essays illustrated with 32 colour images showcases prominent and emerging

voices in the field of photography studies Their research cuts across disciplines and methodologies shedding new light on old questions about histories and their writing Photography and Its Origins will serve as a valuable resource for students and scholars in art history visual and media studies and the history of science and technology **Photography** Michelle

Henning, 2023-01-06 We live in a time in which photographs have become extraordinarily mobile They can be exchanged and circulated at the swipe of a finger across a screen The digital photographic image appears and disappears with a mere gesture of the hand Yet this book argues that this mobility of the image was merely accelerated by digital media and telecommunications Photographs from the moment of their invention set images loose by making them portable reproducible projectable reduced in size and multiplied The fact that we do not associate analogue photography with such mobility has much to do with the limitations of existing histories and theories of photography which have tended to view photographic mobility as either an incidental characteristic or a fault Photography The Unfettered Image traces the emergence of these ways of understanding photography but also presents a differently nuanced and materialist history in which photography is understood as part of a larger development of media technologies It is situated in much broader cultural contexts caught up in the European colonial ambition to grasp the world and in the development of a new artificial second nature dependent on the large scale processing of animal and mineral materials Focussing primarily on Victorian and 1920s 30s practices and theories it demonstrates how photography was never simply a technology for fixing a fleeting reality **Rethinking**
