Conflict is an increasing threat to national and international security and a major challenge to development It is significant to acknowledge that civil conflict has impoverished countries in every major region of the world with specific emphasis on Africa Civil Conflict has wiped out the achievements of decades of economic and social development In case of Liberia which is the main objective of this study the 25 years civil conflict not only wiped out the achievements of decades of economic and social development but destroyed thousands of lives the physical assets of the country and disrupted trade links which devastated the fabrics of the Liberian society The Liberian violent conflict leaves a legacy of militarized guerilla warfare leadership culture divided societies widespread displacement and decimated institutional capacity For many Liberians dealing with devastation of war is a bitter experience that will never be forgotten The present Liberian political context is extremely imperative in any transition from post conflict situation to a more stable and secured environment that will facilitate the national reconciliation of former political adversaries and combatants and lead to a more stable and secured environment that will enable refugees to return to their homes areas and permit the commencement of urgent rehabilitation effort such as the rebuilding of the administrative infrastructure of the country such as the core ministries legal system especially the courts and the opening and operation of ports air ports harbors telecommunication facilities and electricity For these urgent post conflict rehabilitation actions to take place however it was necessary for an elected government to be in place with the clear mandate to govern especially where as in Liberia the conflict originated from a struggle for political power between contending ethnic groups and their armed supporters This scenario has not been a reality for the Liberian people The greatest challenge to the Liberian people however is the post civil conflict reconstruction rehabilitation and recovery indeed for countries emerging from prolong violent conflict This study will be focusing on new system which will require the United States the International Community The European Union The EEC and other Non Governmental Organizations social political and economic cohesion as a pre condition for reconstruction rehabilitation reconciliation and recovery As a practitioner specialist and a 21st century student of politics of life Post

LEGACY: To The Chosen Ian Brisport, 2012-05-07 The process of writing this book originated in a series of philosophical articles intended to be a legacy I would leave to the world The work was quickly put together and completed in the late 1990s In the ensuing years I have reread it from time to time and it remains relevant The information herein is the summation of insight that can serve to inspire pursuit of our greater human potential There is a need for humanity to unfurl its intellectual endeavors from the prison of objective instrumentation No real truth can be discovered when subjective being use subjective instruments under subjective conditions It is time to explore the boundaries of the mind and thought guided by the scientific approach I propose a new way of understanding life the universe and reality itself This I bequeath you

The Impact of Legislatures Philip Norton, 2020-09-10 The Impact of Legislatures brings together key articles and path breaking scholarship published in The Journal of Legislative Studies during its first 25 years of publication enabling the reader to make sense of the impact of legislatures in the modern world Encompassing theory comparative analysis and county based empirical studies the volume examines the impact of legislatures as the key representative institutions of nations addressing their relationships both to government and to the people Legislatures are ubiquitous They provide legitimacy to measures of public policy and to government As such they are key to how a nation is governed But they do much more than confer legitimacy They are generally multi functional and functionally adaptable bodies and are an essential link between citizen and government However scholarship on them has not been extensive and has often been descriptive and country specific limiting the capacity to make sense of them as a particular species of institution The chapters in this volume reflect scholarship that helps the reader appreciate the significance of the place and consequences of legislatures examining not

only the relationship between the legislature and the executive but also the oft neglected relationship between legislatures and the people Reflecting the growing body of research in the field of legislative studies carried by The Journal of Legislative Studies since its inception in 1995 The Impact of Legislatures is essential reading for anyone wishing to understand the impact of legislatures in the world today Accounting Ethics: Theories of accounting ethics and their dissemination J. Edward Ketz,2006 The ruination of investors in Enron WorldCom Waste Management Aldelphia Tyco and scores of other business concerns has raised questions about the adequacy and relevance of academic research into accounting ethics as well as the ethical nature of professional parties This research collection includes important papers from key journals and books that reassess theories research studies and professional practices in the field of accounting ethics In addition to examining the current crisis in the creditability of financial reports many of the papers here work toward developing a body of knowledge that will protect the investing public in the future Rationality in Action Paul K. Moser,1990-10-26 An anthology of previously published pieces that have proven long term importance to theoretical work in rational action

Power Indices and Coalition Formation M.J. Holler,Guillermo Owen,2013-06-29 In recent years publications on power indices and coalition formation have multiplied Obviously the application of these concepts to political institutions more specifically to the analysis of the European Union and as it seems the election of the President of the United States is getting more and more popular There are however also new theoretical instruments and perspectives that support these applications First of all the probabilistic model of coalition formation has to be mentioned which is made operational by the multilinear extension of the characteristic function form of coalition games This instrument triggered off a reinterpretation of existing power indices and the formulation of new indices This development is accompanied by an intensive discussion of the concept of power in general what do we measure when we apply power measures and the properties that an adequate measure of power has to satisfy Various concepts of monotonicity were proposed as litmus test The discussion shows that the underlying theories of coalition formation play a decisive role New results will be discussed in this volume Its contributions put flesh and blood on the theoretical innovations and their applications that led to a growing interest in power indices and coalition formation **The Art of Political Warfare** John J. Pitney, Jr.,2001-09-01 Drawing parallels between war and politics the author explains why military principles can be applied to an understanding of the events concepts concerns issues and practices of political life
