Chinese Path to Modernization Jun Yin, 2024-03-12 This book exploratively reviews and refines the theoretical system of economics with Chinese characteristics and the analytical framework of Chinese path to modernization. This book aims to reveal answers to the three questions: what has the theoretical system of economics with Chinese characteristics inherited and developed? What are the experiences and lessons of all countries' modernization in the world? What is the universality and particularity of Chinese Path to Modernization? As conclusion, the author draws a clue to understand Chinese path to modernization which is neither making up for the lessons nor a convergence but an innovation built upon the general principles of modernization. Its universality lies in the overall patterns and trends of modernization that is the consistent process of the country's pursuit of national economic growth and people's prosperity. The distinctiveness of this path lies in the concurrent transformation of Chinese economic system and the institutional innovations with Chinese characteristics that unfold throughout this ongoing economic process.

**To Teach, To Delight, and To Move** David S. Cunningham, 2004-10-22 This book initiates a new conversation about how theological education might be re-envisioned for the twenty-first century church. The prevailing curricular structure in today's seminaries and divinity schools was fashioned in a very different era, one that assumed the continued cultural dominance of Christianity and the continued academic dominance of the canons of Enlightenment reason. Neither assumption is viable in today's post-Christian world; hence, our new circumstances demand a new vision for theological education. The authors of this volume offer an important resource for this project through their creative appropriation of the classical rhetorical tradition, particularly as it has been rehabilitated in the contemporary context. Like St. Augustine, they believe that the chief goals of Christian theology are similar to those of classical rhetoric: to teach, to delight, and to move. And the authors are united in their conviction that these must also be the goals of theological education in a post-Christian era. This volume arises out of a passionate commitment to the cause of theological education.

The authors hail from a wide range of denominational traditions and have taught in numerous seminaries and divinity schools. They have also studied the classical and postmodern rhetorical traditions in both theory and practice. They met as a group on numerous occasions to read one another's contributions to the volume and to offer guidance for the process of rewriting. As a result, this book is much more than a mere collection of essays; it is a jointly authored work and one which presents an integrated vision for the future of theological education.

Reason and Democracy Thomas A. Spragens, 1990-07-20 Reason and Democracy breaks new ground in providing a plausible philosophical basis for the communitarian view of a healthy democracy as the rational pursuit of common purposes by free and equal citizens. Thomas A. Spragens Jr. argues that the most persistent paradigms of Western political rationality originated in classical philosophy took their modern expression in the philosophies of Kant and Mill and terminated in Max Weber's pairing of purely technical rationality with arbitrary ends. Drawing on recent work in the philosophy of science and the philosophy of language combined with appropriate analogies in political thought and action, Spragens maintains that it is possible to discern the outlines of a philosophically cogent and morally beneficial concept of rational practice on the part of a political community. This possibility, he contends, provides a philosophical basis for liberal democratic politics that is superior to utilitarian and deontological accounts.

From Accelerated Accumulation to Socialist Market Economy in China Kjeld Erik Brodsgaard, Koen Rutten, 2017-04-03 In *From Accelerated Accumulation to Socialist Market Economy in China*, Kjeld Erik Brodsgaard and Koen Rutten examine China's indigenous economic discourse and its relation to both economic policy making and the overall trajectory of development from the First Five Year Plan in 1953 to 2016. In so doing, this volume demonstrates that although the form of the current economic system and its theoretical underpinnings bear scant resemblance to those of the planned economy, economic policy making still relies on the principle of accelerated accumulation which lay at the heart of the economic development project in the early years of the People's Republic.
