## **Rationing Health Care In America Perceptions And Principles Of Justice:**

Rationing Health Care in America Larry R. Churchill, 1987      *Health Care Reform* Audrey R. Chapman, 1994-05-01  
Arguing that health care should be a human right rather than a commodity the distinguished contributors to this volume call for a new social covenant establishing a right to a standard of health care consistent with society's level of resources By linking rights with limits they offer a framework for seeking national consensus on a cost conscious standard of universal medical care The authors identify the policy implications of recognizing and implementing such a right and develop specific criteria to measure the success of health care reform from a human rights perspective Health Care Reform also offers specific and timely criticism of managed competition and its offspring the Clinton plan for health care reform Because health care reform will inevitably be an ongoing process of assessment and revision especially since managed competition has not been implemented elsewhere this book will last beyond the moment by providing vital standards to guide the future evolution of the health care system      *Catholicism and Health-Care Justice* Philip S. Keane, 2002 Of Catholic principles for health care justice Managed care definition history and moral successes Managed care problems and potential solutions Ethics of mergers joint ventures and other reconfigurations Public policy and contemporary health care Some particular problems in health care justice Toward some overall conclusions about health care justice today      An American Health Dilemma: Race, medicine, and health care in the United States 1900-2000 W. Michael Byrd, Linda A. Clayton, 2000 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality      **Changing Health Care Systems from Ethical, Economic, and Cross Cultural Perspectives** Erich E.H. Loewy, Roberta Springer Loewy, 2001-05-31 This volume explores the impact of various health care structures on the ability of health care professionals to practice in an ethically acceptable manner The limits of ethical possibility are created by the system within which health care workers must practice a system which mandates getting to know your patient but at the same time is restricted by financial concerns of a hospital hospice or a health management organization This juxtaposition of the two conflicting concerns of a health care worker is discussed in this volume Among the issues addressed are Is it possible to appreciate patients goals and values within a system that mandates that only a short time be spent with each patient Ethical issues raised in a system where patients are treated by different physicians inside and outside the hospital Health care ethics which deal with the concerns of those with access to care but are not concerned with the needs of those who lack access to care This volume will be of interest to health care ethicists as well as health care professionals      **Future Survey Annual 1988-1989** Michael Marien, Lane Jennings, 1990-01-01 BMW Z cars have carved a huge reputation for themselves in a very

short time From the revolutionary and innovative Z1 of the late 1980s to the beautiful and exclusive Z8 of more recent times via the popular Z3 and its controversial replacement the Z4 the family has made BMW s name in the increasingly competitive sports car market

**An American Health Dilemma** W. Michael Byrd,Linda A. Clayton,2001-12-21 First published in 2002 An American Health Dilemma is the story of medicine in the United States from the perspective of people who were consistently officially mistreated abused or neglected by the Western medical tradition and the US health care system It is also the compelling story of African Americans fighting to participate fully in the health care professions in the face of racism and the increased power of health corporations and HMOs This tour de force of research on the relationship between race medicine and health care in the United States is an extraordinary achievement by two of the leading lights in the field of public health Ten years out it is finally updated with a new third volume taking the story up to the present and beyond remaining the premiere and only reference on black public health and the history of African American medicine on the market today No one who is concerned with American race relations with access to and quality of health care or with justice and equality for humankind can afford to miss this powerful resource

Textbook of Healthcare Ethics Erich E.H. Loewy,Roberta Springer Loewy,2006-01-16 1 Historical Introduction INTRODUCTION This chapter is mainly about the history of medicine and its ethics As usually c ceived history is retrograde It is what happened yesterday and much as we may try it is what happened yesterday seen with a set of today s eyes Trying to understand yesterday s culture may help us put on a pair of corrective glasses but it fails in tirely correcting our vision Contemporary cultural anthropology may likewise help us understand the way today s events and cultural habits shape what we call history tomorrow Past events and the kaleidoscopic pattern of today s cultures may help guide us into a future that in at least some respects is ours to forge Learning about ethics yesterday and thinking about ethics as it expresses itself in various cultures today can help us shape the ethics of tomorrow This is true whether we are speaking of that part of social ethics called medical or of any other part of social ethics The social aspects of medical practice how the institution called medicine fits into and works within the greater society called culture shape the way its ethics ultimately must play itself out

**Rethinking Rights and Responsibilities** Arthur J. Dyck,2005-02-08 As members of various and often conflicting communities how do we reconcile what we have come to understand as our human rights with our responsibilities toward one another With the bright thread of individualism woven through the American psyche where can our sense of duty toward others be found What has happened to our love even our concern for our neighbor In this revised edition of his magisterial exploration of these critical questions renowned ethicist Arthur Dyck revisits and profoundly hones his call for the moral bonds of community In all areas of contemporary life be it in business politics health care religion and even in family relationships the right of individuals to consider themselves first has taken precedence over our responsibilities toward others Dyck contends that we must recast the language of rights to take into account our once natural obligations to all the communities of which we are a part Rethinking Rights and

Responsibilities at the nexus of ethics political theory public policy and law traces how the peculiarly American formulations of the rights of the individual have assaulted our connections with and responsibilities for those around us Dyck critically examines contemporary society and the relationship between responsibilities and rights particularly as they are expressed in medicine and health care to maintain that while indeed rights and responsibilities form the moral bonds of community we must begin with the rudimentary task of taking better care of one another

**Community Organizing and Community Building for Health** Meredith Minkler,2005

**The Political Economy of Health Care Development and Reforms in Hong Kong** Victor C.W. Wong,2019-05-23 First published in 1999 this book constitutes a unique account of the development and reform of health care in Hong Kong Its main focus is on policy developments since 1945 Victor Wong demonstrates the development of a two tier health system in both a capitalist and Chinese context His work is one of both health policy and political economy Wong utilises the latter perspective to show the state s role in the interests of capital the public demand for health care and the power of the medical profession Alongside this Wong brings in the role of Chinese and family medicine and the role of the family in cost containment and minimising the hospitalisation of elderly frail and chronically ill patients The volume is the most comprehensive analysis available for health policy in Hong Kong

**Canadian Social Policy** Anne Westhues,Brian Wharf,2012-05-25 Social policy shapes the daily lives of every Canadian citizen and should reflect the beliefs of a majority of Canadians on just approaches to the promotion of health safety and well being Too often those on the front lines social workers nurses and teachers observe that policies do not work well for the most vulnerable groups in society In the first part of this new edition of Canadian Social Policy Westhues and Wharf argue that service deliverers have discretion in how policies are implemented and the exercise of this discretion is how citizens experience policy whether or not it is fair and reasonable They show the reader how social policy is made and they encourage active citizenship to produce policies that are more socially just New material includes an examination of the reproduction of systemic racism through the implementation of human rights policy and a comparative analysis of the policy making process in Quebec and English Canada The second part of the book discusses policy issues currently under debate in Canada Included are new chapters that explore parental leave policies and housing as a determinant of health All chapters contain newly updated statistical data and research and policy analysis A reworked section on the process of policy making and the addition of questions for critical reflection enhance the suitability of the book as a core resource in social policy courses The final chapter explores how front line workers in the human services can advocate for change in organizational policies that will benefit the people supported

**Community Organizing and Community Building for Health and Welfare** Meredith Minkler,2012-07-16 The third edition of Community Organizing and Community Building for Health and Welfare provides new and more established ways to approach community building and organizing from collaborating with communities on assessment and issue selection to using the power of coalition building media advocacy and social media to enhance the effectiveness of such work With a

strong emphasis on cultural relevance and humility this collection offers a wealth of case studies in areas ranging from childhood obesity to immigrant worker rights to health care reform A tool kit of appendixes includes guidelines for assessing coalition effectiveness exercises for critical reflection on our own power and privilege and training tools such as policy bingo From former organizer and now President Barack Obama to academics and professionals in the fields of public health social work urban planning and community psychology the book offers a comprehensive vision and on the ground examples of the many ways community building and organizing can help us address some of the most intractable health and social problems of our times Dr Minkler s course syllabus Although Dr Minkler has changed the order of some chapters in the syllabus to accommodate guest speakers and help students prep for the midterm assignment she uses she arranged the actual book layout in a way that should flow quite naturally if instructors wish to use it in the order in which chapters appear

**Mormonism, Medicine, and Bioethics** Courtney S. Campbell, 2021 Moral Realities is the first comprehensive treatment of teachings and practices on medical care and ethics espoused by The Church of Jesus Christ of Latter day Saints LDS or Mormon It uses first person experiences to portray LDS perspectives on bioethical topics such as abortion genetic testing and enhancements in vitro fertilization medical assisted death medicinal marijuana neonatal intensive care organ donation preventive health care universal access to care and vaccinations The book provides an appendix of historically significant LDS ecclesiastical teachings and policies on medical health and moral issues making it a definitive educational and reference compilation

**Canadian Social Policy, Fifth Edition** Anne Westhues, Brian Wharf, 2012-05-25 Social policy shapes the daily lives of every Canadian citizen and should reflect the beliefs of a majority of Canadians on just approaches to the promotion of health safety and well being Too often those on the front lines social workers nurses and teachers observe that policies do not work well for the most vulnerable groups in society In the first part of this new edition of Canadian Social Policy Westhues and Wharf argue that service deliverers have discretion in how policies are implemented and the exercise of this discretion is how citizens experience policy whether or not it is fair and reasonable They show the reader how social policy is made and they encourage active citizenship to produce policies that are more socially just New material includes an examination of the reproduction of systemic racism through the implementation of human rights policy and a comparative analysis of the policy making process in Quebec and English Canada The second part of the book discusses policy issues currently under debate in Canada Included are new chapters that explore parental leave policies and housing as a determinant of health All chapters contain newly updated statistical data and research and policy analysis A reworked section on the process of policy making and the addition of questions for critical reflection enhance the suitability of the book as a core resource in social policy courses The final chapter explores how front line workers in the human services can advocate for change in organizational policies that will benefit the people supported

**Bearing Witness** Courtney S. Campbell, 2019-09-09 In Bearing Witness Courtney S Campbell draws on his experience as a teacher scholar and a bioethics

consultant to propose an innovative interpretation of the significance of religious values and traditions for bioethics and health care The book offers a distinctive exposition of a covenantal ethic of gift response responsibility transformation that informs a quest for meaning in the profound choices that patients families and professionals face in creating sustaining and ending life Campbell s account of bearing witness offers new understandings of formative ethical concepts situates medicine as a calling and vocation rooted in concepts of healing affirms professional commitments of presence for suffering and dying persons and presents a prophetic critique of medical assisted death This book offers compelling critiques of secular models of medical professionalism and of individualistic assumptions that distort the physician patient relationship This innovative interpretation bears witness to the relevance of religious perspectives on an array of bioethical issues from new reproductive technologies to genetics to debates over end of life ethics and bears witness against the oddities of a market oriented and consumerist vision of health care that is especially salient for an era of health care reform Human Dignity and

Contemporary Liberalism Brad Stetson,1998-01-21 The author of Human Dignity and Contemporary Liberalism argues that the nature and application of contemporary liberalism is significantly dissonant with the deepest inclinations and most persistent moral sentiments of human beings and it therefore distorts human self understanding and defaces human dignity This mismatch between human nature and the essence of contemporary liberalism hobbles our public life and the author suggests is the Gordian knot that must be loosed if the new millennium is to manifest a more humane and satisfying American civitas This wide ranging book begins with a discussion of certain consequences and implications of contemporary liberalism s heavy emphasis on individual rights moving into a reflection on two general categories of human dignity suggesting that there is in contemporary liberal thought a lack of clarity concerning the meaning and gravity of this concept The focus then shifts to the idea of desert or deservingness The viability of desert rightly understood is advanced as a useful general concept for understanding American public life and as an important tool for restoring a measure of common sense to our politics The second section of the book concentrates on the actual application of contemporary liberalism s values as it has occurred since the 1960s particularly in the culturally contentious areas of race and abortion Emerging from this survey is an unflattering image of a political paradigm which according to the author must be abandoned or at least radically revised if America is to strike a posture of moral intensity and genuine social understanding **An Ethics Casebook for Hospitals**

Mark G. Kuczewski,Rosa Lynn B. Pinkus,1999-04-22 This collection of thirty one cases and commentaries addresses ethical problems commonly encountered by the average health care professional not just those working on such high tech specialties as organ transplants or genetic engineering It deals with familiar issues that are rarely considered in ethics casebooks including such fundamental matters as informed consent patient decision making capacity the role of the family and end of life decisions It also provides resources for basic but neglected ethical issues involving placement decisions for elderly or technologically dependent patients rehabilitation care confidentiality regarding AIDS professional responsibility and

organizational and institutional ethics The authors describe in detail the perspectives of each party to the case the kind of language that ethicists use to discuss the issues and the outcome of the case A short bibliography suggests useful articles for further reading or curriculum development Easily understood by readers with no prior training in ethics this book offers guidance on everyday problems from across the broad continuum of care It will be valuable for health care professionals hospital ethics committees and for students preparing for careers in health care professions

**Autonomy and Clinical Medicine** J. Bergsma, David C. Thomasma, 2013-03-14 This book arises from a two fold conviction The first is that autonomy despite recent critiques about its importance in bioethics and philosophy of medicine and the traditional resistance of medicine to its intrusion into the doctor patient relation is a fundamental building block of an individual s identity and mechanisms for dealing with illness disease and incapacity As such it is an essential component in the health care professional s armamentarium employed to bring about healing Furthermore it functions in a similar way to assist the health professional in his or her relations to the sick and injured The second conviction follows from the first Autonomy is far more complex than appears from the philosophical use of the concept In this conviction we join those who have criticized the over reliance on autonomy in modern secular bioethics originating in the United States but gaining ascendancy in other cultures This critique relies on appeals to the richer contexts of persons lives Elsewhere the contemporary critique of autonomy appears in a variety of alternative ethical models like narrative ethics casuist ethics and contextualism Indeed postmodern criticism of all bioethics argues that there is no defensible foundation for claims that one ought to respect autonomy or any other principle as a way of ensuring that one is ethical

**Community Organizing and Community Building for Health and Social Equity, 4th edition** Meredith Minkler, Patricia Wakimoto, 2021-12-10 The fourth edition of Community Organizing and Community Building for Health and Social Equity provides both classic and recent contributions to the field with a special accent on how these approaches can contribute to health and social equity The 23 chapters offer conceptual frameworks skill building and case studies in areas like coalition building organizing by and with women of color community assessment and the power of the arts the Internet social media and policy and media advocacy in such work The use of participatory evaluation and strategies and tips on fundraising for community organizing also are presented as are the ethical challenges that can arise in this work and helpful tools for anticipating and addressing them Also included are study questions for use in the classroom Many of the book s contributors are leaders in their academic fields from public health and social work to community psychology and urban and regional planning and to social and political science One author was the 44th president of the United States himself a former community organizer in Chicago who reflects on his earlier vocation and its importance Other contributors are inspiring community leaders whose work on the ground and in partnership with us outsiders highlights both the power of collaboration and the cultural humility and other skills required to do it well Throughout this book and particularly in the case studies and examples shared the role of context is critical and never far

from view Included here most recently are the horrific and continuing toll of the COVID 19 pandemic and a long overdue yet still greatly circumscribed national reckoning with systemic racism in the aftermath of the brutal police killing of yet another unarmed Black person and then another and another seemingly without end In many chapters the authors highlight different facets of the Black Lives Matter movement that took on new life across the country and the world in response to these atrocities In other chapters the existential threat of climate change and grave threats to democracy also are underscored View the Table of Contents and introductory text for the supplementary instructor resources [https://d3tto5i5w9ogdd.cloudfront.net/wp-content/uploads/2022/02/04143046\\_9781978832176\\_optimized\\_sampler.pdf](https://d3tto5i5w9ogdd.cloudfront.net/wp-content/uploads/2022/02/04143046_9781978832176_optimized_sampler.pdf) Supplementary instructor resources are available on request <https://www.rutgersuniversitypress.org/communityorganizing>
