Architecting the Future Enterprise Deborah J. Nightingale, Donna H. Rhodes, 2024-06-11 Two experts in enterprise architecting lay out a holistic approach to creating a blueprint for future enterprise transformation Every enterprise evolves continuously driven by

changing needs or new opportunities Most often this happens gradually with small adjustments to strategy organization processes or infrastructure But sometimes enterprises need to go beyond minor fixes and transform themselves in response to a disruptive event or dramatically changing circumstances a merger for example or a new competitor In this book enterprise architecting experts Deborah Nightingale and Donna Rhodes offer a framework for enterprise transformation Successful transformation they believe starts with a holistic approach taking into consideration all facets of the enterprise and its environment rather than focusing solely on one factor information technology for example or organizational structure This is architecting the future enterprise creating a blueprint for what the enterprise will look like after the transformation Nightingale and Rhodes introduce the ARIES Architecting Innovative Enterprise Strategy framework including a ten enterprise element model and an architecting process model and show how to apply it from start to finish They explain how to create a holistic vision for the future enterprise and how to generate concepts and alternative architectures they describe techniques for evaluating possible architectures tools for implementation planning and strategies for communicating with stakeholders Nightingale and Rhodes offer real world examples throughout drawing on their work at MIT with an extensive case study of enterprise transformation at a medical device manufacturer An appendix offers two additional architecting projects Seven Architecting Imperatives Make architecting the initial activity in transformation Develop a comprehensive understanding of the enterprise landscape Understand what stakeholders value and how that may change in the future Use multiple perspectives to see the whole enterprise Create an architecting team suited to the transformation challenges Engage all levels of leadership in transformation Architect for the enterprise s changing world [Handbook on Architectures of Information Systems](#) Peter Bernus,Kai Mertins,Günter Schmidt,2006-04-18 An authoritative source about methods languages methodologies and supporting tools for constructing information systems that also provides examples for references models Its strength is the careful selection of each of the above mentioned components based on technical merit The second edition completely revises all articles and features new material on the latest developments in XML UML The structure follows the definition of the major components of Enterprise Integration as defined by GERAM Generalised Enterprise Reference Architecture and Methodology 1st edition sold about 600 copies since January 2003 **Management of E-commerce and E-government** Zhong Yuansheng,2007 E Commerce and E Government has become known as the wave of the future for business all over the world Whether large small or just starting E Commerce and E Government have been the easier and more sufficient way to handle business This book brings together revised and expanded versions of eighteen papers selected from the 2003 International Conference on Management of e Commerce and e Government This book presents leading edge research in this new and exciting field The ICMcG 2003 has initially received a total of 176 submissions from Australia China Norway UK and USA Unfortunately risk of SARS prevented many authors from actually participating in the conference The Program Committee of ICMcG selected papers through a careful reviewing process

Although some papers remain devoted to conceptual and general discussion about e Commerce management many papers have adopted quantitative or formal analysis methods in their research Results presented in these papers provide an important contribution especially as compared with earlier research based on qualitative methods alone This book presents cutting edge research in this new and exciting field

Collaborative Business Ecosystems and Virtual Enterprises Luis M. Camarinha-Matos, 2002-04-30 Towards collaborative business ecosystems Last decade was fertile in the emerging of new collaboration mechanisms and forms of dynamic virtual organizations leading to the concept of dynamic business ecosystem which is supported or induced by the progress of the ubiquitous I pervasive computing and networking The new technologies collaborative business models and organizational forms supported by networking tools invade all traditional businesses and organizations what requires thinking in terms of whole systems i e seeing each business as part of a wider economic ecosystem and environment It is also becoming evident that the agile formation of very dynamic virtual organizations depends on the existence of a proper longer term embedding or nesting environment e g regional industry cluster in order to guarantee certain basic requirements such as trust building Trusting your partner is a gradual and long process common interoperability ontology and distributed collaboration infrastructures agreed business practices requiring substantial engineering Ire engineering efforts a sense of community we vs the others and some sense of stability when is a dynamic state or a stationary state useful The more frequent situation is the case in which this nesting environment is formed by organizations located in a common region although geography is not a major facet when cooperation is supported by computer networks
