Re Thinking American Education A Philosophy Of Teaching And Learning:

Re-thinking American Education Jesse Glenn Gray,1984 Rethinking Science Education Roland M.

Schulz,2014-08-01 This book presents a philosophy of science education as a research field as well as its value for curriculum instruction and teacher pedagogy It seeks to re think science education as an educational endeavour by examining why past reform efforts have been only partially successful including why the fundamental goal of achieving scientific literacy after several reform waves has proven to be so elusive The identity of such a philosophy is first defined in relation to the fields of philosophy philosophy of science and philosophy of education It argues that educational theory can support teacher s pedagogical content knowledge and that history philosophy and sociology of science should inform and influence pedagogy Some case studies are provided which examine the nature of science and the nature of language to illustrate why and how a philosophy of science education contributes to science education reform It seeks to contribute in general to the improvement of curriculum design and science teacher education The perspective to be taken on board is that to teach science is to have a philosophical frame of mind about the subject about education about one s personal teacher identity *Rethinking the*

History of American Education W. Reese,J. Rury,2007-12-25 This collection of original essays examines the history of American education as it has developed as a field since the 1970s and moves into a post revisionist era and looks forward to possible new directions for the future Contributors take a comprehensive approach beginning with colonial education and spanning to modern day while also looking at various aspects of education from higher education to curriculum to the manifestation of social inequality in education The essays speak to historians educational researchers policy makers and others seeking fresh perspectives on questions related to the historical development of schooling in the United States

Rethinking Liberal Education Nicholas H. Farnham,Adam Yarmolinsky,1996-01-11 Liberal education has always had its share of theorists believers and detractors both inside and outside the academy The best of these have been responsible for the development of the concept and of its changing tradition Drawn from a symposium jointly sponsored by the Educational Leadership program and the American Council of Learned Societies this work looks at the requirements of liberal education for the next century and the strategies for getting there With contributions from Leon Botstein Ernest Boyer Howard Gardner Stanley Katz Bruce Kimball Peter Lyman Susan Resneck Pierce Adam Yarmolinsky and Frank Wong Rethinking Liberal Education proposes better ways of connecting the curriculum and organization of liberal arts colleges with today s challenging economic and social realities The authors push for greater flexibility in the organizational structure of academic departments and argue that faculty should play a greater role in the hard discussions that shape their institutions Through the implementation of interdisciplinary and collaborative approaches to learning along with better integration of the curriculum with the professional and vocational aspects of the institution this work proposes to restore vitality to the curriculum The concept of rethinking liberal education does not mean the same thing to every educator To one it may mean a

strategic shift in requirements to another the reformulation of the underlying philosophy to meet changing times Any significant reform in education needs careful thought and discussion Rethinking Liberal Education makes a substantial contribution to such debates It will be of interest to scholars and students administrators and anyone concerned with the issues of modern education *Working Adolescents: Rethinking Education For and On the Job* Mary Ann Maslak,2022-03-12 This book offers a new approach to workforce education for youth It provides meaningful and essential insight into educational systems and practices through cases of vocational and technical education in the People s Republic of China the Republic of Italy and the United States of America The cases describe the history of the multi faceted vocational systems and provide in doing so a springboard for this new work A conceptual framework comprised of the cognitive psychological and social building blocks of individual development explains the multifaceted dimensions of youth that contribute to the policies and practices of traditional adolescent educational models The framework extends that base by drawing on a multidisciplinary collection of research from both sociology and business to create a new transdisciplinary model for educational practice It highlights the important but often under studied relationship between educational institutions and workplaces The book culminates in an original model Community Works which advances both formal and non formal educational programming and curricula The model details a practical program for youth including roles and responsibilities of all stakeholders and a curricular map information on lesson planning varieties of instructional strategies and tools for assessment and evaluation for professionals **Rethinking Intelligence** Joe L. Kincheloe, Shirley R. Steinberg, Leila Villaverde,2013-08-21 Arguing that a comprehensive theoretical overhaul of mainstream educational psychology is long overdue Rethinking Intelligence suggests criteria upon which new models can be developed The contributors reconceptualize educational psychology through a democratic vision of inclusivity that takes into account the culturally inscribed nature of research They offer a theoretical and historical critique of how intelligence is measured in ways that exclude or ignore other criteria By doing so they hope to encourage educators and researchers to imagine new forms of intelligence education and life **Heidegger in America** Martin Woessner,2010-12-20 Heidegger in America explores the surprising legacy of his life and thought in the United States of America As a critic of modern life Heidegger often lamented the growing global influence of all things American However it was precisely in America where his thought inspired the work of generations of thinkers not only philosophers but also theologians architects novelists and even pundits As a result the reception and dissemination of Heidegger s philosophical writings transformed the intellectual and cultural history of the United States at a time when American influence was itself transforming the world A case study in the complex and sometimes contradictory process of transnational exchange Heidegger in America recasts the scope and methods of contemporary intellectual and cultural history in the age of globalization challenging what we think we know about Heidegger and American ideas simultaneously **Rethinking Educational Theory** Rupert Wegerif,2025-02-12 The theory of education as expanding dialogue outlined in

this insightful book shows how education can be designed to support the collective intelligence and global citizenship we need in response to the challenges of the Anthropocene and the rise of AI

Rethinking Sexual Identity in Education Susan Birden, 2005 Rethinking Sexual Identity in Education responds to the wide spread abuse of lesbian gay bisexual transgender and questioning persons LGBTQs in diverse educational environments by utilizing published narratives of LGBTQs educational experiences Conceptualizing a praxis for LGBTQ allies to use in teaching and learning about sexual identity in ways that can transform educational practices and policies this work bridges gaps between theory and practice liberal and postmodern thought invention and intervention Visit our website for sample chapters

Rethinking School-University Partnerships Prentice T. Chandler, Lisa Barron, 2021-05-01 Rethinking School University Partnerships A New Way Forward provides educational leaders in K 12 schools and colleges of education with insight advice and direction

into the task of creating partnerships In current times colleges of education and local school districts need each other like never before School districts struggle with pipeline recruitment and retention issues Colleges of education face declining enrollment and a shifting educational landscape that fundamentally changes the way that teachers are trained and what local school districts expect their teachers to be able to do It is with these overlapping constraints and converging interests that partnerships emerge as a foundational strategy for strengthening the education of our teachers With nearly 80 contributors from 16 states and Jamaica representing 39 educational institutions the partnerships described in this book are different from the ways in which colleges of education and school districts have traditionally worked with one another In the past these loose relationships centered primarily on student teaching and or field experience placements In this arrangement the relationship was directed towards ensuring that the local schools were amenable to hosting students from the college of education so that the student candidate could complete the requirements to earn a teaching license In our view this paradigm needs to be enlarged and shifted

Rethinking Technology in Schools Primer Vanessa Elaine Domine, 2009

Among the many challenges facing public schooling in the United States is the often irrelevant usage of technology in the classroom in ways that support the textbook and computer industries more than student learning and achievement. This primer reframes the longstanding debate about instructional technology in school classrooms and challenges the reader to think more critically and conscientiously about the fundamental communication and technological processes that mediate learning and ultimately define education. The primer offers educators at all levels a three dimensional map for exploring the philosophical, pedagogical and practical uses of technology to serve rather than subvert the public purposes of education in a democracy.

Rethinking the Way We Teach Science Louis Rosenblatt, 2011-03-17 Offering a fresh take on inquiry, this book draws on current research and theory in science education, literacy and educational psychology as well as the history and philosophy of science to make its case for transforming the way science is taught. *Rethinking the Way We Teach Science* addresses major themes in national reform documents and movements: how to place students at the center of what happens in the classroom; how to shift the focus from giving answers to building arguments; how to move beyond narrow disciplinary boundaries to integrated explorations of ideas and issues that connect directly with students; and most especially, the importance of engaging students in discussions of an interactive and explanatory character. Deeply anchored in the classroom, highly interactive and relevant across grade levels and subject matter, above all this is a book about choosing to place the authority of reason over that of right answers.

Rethinking the Curriculum Orlando Nang Kwok Ho, 2018-12-13 This book is an interdisciplinary endeavour. Encompassing education and basic research, it discusses the modular curriculum embodied in *The Epistle* from educational, historical, sociolinguistic, anthropological, phenomenological and non-sectarian perspectives. It shows the cross-boundary philosophical reasoning and pedagogic dimensions of St Paul as a great teacher and thinker from the Jewish and Christian faith. In doing so, this book refocuses academia's attention on the inevitable antimononic nature inherent in human efforts to create systemic knowledge. Knowledge about the inner aesthetic and volitional interpretative self, the immanent psychic I and other philosophical aspects of the realm of the transcendental should be rescued from the deepening trends of secularity. Being strong, powerful, productive and performative should not be taken as the indisputable and exclusive aim of education. Science, Technology, Engineering and Mathematics (STEM) do not constitute a sufficient basis for building a better humanity. Education via public curriculums ought to serve both the belly and the mind. Deliberative curricular recalibrations with rationales for grace are thus needed for a better future for humanity. This book is relevant for anyone with a core fascination about truths, values, epistemologies, life, spirituality and holistic human development. It can also be used as a textbook or a reference in a number of fields including counselling psychology, translation, cultural studies and theology.
