Reaching Out Her Young Children Learning:

Understanding How Young Children Learn Wendy L. Ostroff, 2012-08-24 Human beings are born to learn. During the last few decades, developmental science has exploded with discoveries of how specifically learning happens. This provides us with an unprecedented window into children's minds: how and when they begin to think, perceive, understand, and apply knowledge. Wendy Ostroff builds on this research and shows you how to harness the power of the brain, the most powerful learning machine in the universe. She highlights the processes that inspire or propel learning: play, confidence, self-regulation, movement, mnemonic strategies, metacognition, articulation, and collaboration, and distills the research into a synthesis of the most important takeaway ideas that teachers will need as they design their curriculum and pedagogy. Each chapter has suggested activities for exactly how teachers can put theory into practice in the classroom. When you understand how your students learn, you will know how to teach them in ways that harness the brain's natural learning systems. Dr. Wendy L. Ostroff is Associate Professor in the Program for the Advancement of Learning at Curry College. [Learning Environments for Young Children](#)

Sandra Feinberg, Joan F. Kushner, Sari Feldman, 1998 The vision of Learning Environments for Young Children: Rethinking Library Spaces and Services is about learning families and community where the public library presents a community-based educational setting in which librarians serve as educators, guides, coaches, and facilitators of lifelong active learning access for children to enriching, satisfying, and developmentally appropriate resources and learning opportunities: diverse collections, programs, and technical resources for young children and the adults in their lives; programs and resources that encourage children's focused participation, creativity, critical thinking, cooperation, and problem solving; and a nonjudgmental, integrated, and interdisciplinary approach to lifelong learning, developing the whole person, child or adult. Included in Learning Environments for Young Children are field-tested measuring instruments that you and your staff can use to conduct a qualitative assessment of your library's children's services. These ready-to-use forms will help you collect information that will highlight the importance of early childhood services in presentations to funding sources, trustees, and other key stakeholders. **Helping Children Learn About Domestic Abuse and Coercive Control**
