Collective Guilt Nyla R. Branscombe, Bertjan Doosje, 2004-09-06 Emotion can result from interpreting group actions as reflecting on the self due to an association between the two This volume considers the nature of collective guilt the antecedent conditions necessary for it to be experienced how it can be measured as well as how collective guilt differs from other group based emotions Research from Australia Canada Germany Israel the Netherlands Northern Ireland and the USA addresses critical questions concerning the who when and why of the experience of collective guilt The political implications of collective guilt and forgiveness for the past are considered and how those might depend on the national context How collective guilt can be harnessed and used to create a more peaceful future for groups with a history of violence between then is emphasized

They Still Pick Me Up when I Fall Diana Mendley Rauner, 2000 Rauner demonstrates a direct connection between caring in face to face interactions and caring organizations and a caring society arguing that such a connection is central to our teaching of and expectations for youth She also posits caring as a way to conceptualize social justice and recognize the connection between public and private morality Each chapter opens with an overview of a youth serving organization and includes at least one case study

Empathy and Morality Heidi L. Maibom, 2014-06-02 The relationship between empathy and morality has long been debated Adam Smith and David Hume famously argued that our tendency to feel with our fellow human beings played a foundational role in morality And while recent decades have seen a resurgence of interest in the idea that empathy or sympathy is central to moral judgment and motivation the view is nonetheless increasingly attacked Empathy is so morally limited some argue that we should focus our attention elsewhere Yet the importance of our capacities to feel with and for others is hard to deny This collection is dedicated to the question of the importance of these capacities to morality It brings together twelve original papers in philosophy psychology psychiatry anthropology and neuroscience to give a comprehensive overview of the issue and includes an extensive survey of empathy and empathy related emotions Some contributors argue that empathy is essential to core cases of moral judgments others that empathic concern and moral considerations give rise to wholly distinct motives Contributors look at such issues as the absence of empathy in psychopaths the use of empathy training for rehabilitating violent offenders and the presence of empathy in other primates The volume is distinctive in focusing on the moral import of empathy and sympathy
