The Achievement Gap in Reading Rosalind Horowitz,S. Jay Samuels,2017-04-07 In this volume prominent scholars experts in their respective fields and highly skilled in the research they conduct address educational and reading research from varied perspectives and address what it will take to close the achievement gap with specific attention to reading The achievement gap is redefined as a level at which all groups can compete economically in our society and have the literacy tools and habits needed for a good life Bringing valuable theoretical frameworks and in depth analytical approaches to interpretation of data the contributors examine factors that contribute to student achievement inside the school but which are also heavily influenced by out of school factors such as poverty and economics ethnicity and culture family and community stratifications and approaches to measurement of achievement These out of school factors present possibilities for new policies and practice The overarching theme is that achievement gaps in reading are complex and that multiple

perspectives are necessary to address the problem The breadth and depth of perspectives and content in this volume and its conceptualization of the achievement gap are a significant contribution to the field

Reading Fluency Timothy Rasinski, William Rupley, David Paige, Chase Young, 2021-01-21 Reading fluency has been identified as a key component of proficient reading Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement Despite the great potential for fluency to have a significant outcome on students reading achievement it continues to be not well understood by teachers school administrators and policy makers The chapters in this volume examine reading fluency from a variety of perspectives The initial chapter sketches the history of fluency as a literacy instruction component Following chapters examine recent studies and approaches to reading fluency followed by chapters that explore actual fluency instruction models and the impact of fluency instruction Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention Two articles on assessment one focused on word recognition and the other on prosody expand our understanding of fluency measurement Finally a study from Turkey explores the relationship of various reading competencies including fluency in an integrated model of reading Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction
