Butler, Elaine R. Silliman, 2001-12-01 The ability to use language in more literate ways has always been a central outcome of education Today however being literate requires more than functional literacy the recognition of printed words as meaningful It requires the knowledge of how to use language as a tool for analyzing synthesizing and integrating what is heard or read in order to arrive at new interpretations Specialists in education cognitive psychology learning disabilities communication sciences and disorders and other fields have studied the language learning problems of school age children from their own perspectives All have tended to emphasize either the oral language component or phonemic awareness The major influence of phonemic awareness on learning to read and spell is well researched but it is not the only relevant focus for efforts in intervention and instruction An issue is that applications are usually the products of a single discipline or profession and few integrate an understanding of phonemic awareness with an understanding of the ways in which oral language comprehension and expression support reading writing and spelling Thus what we have learned about language remains disconnected from what we have learned about literacy interrelationships between language and literacy are not appreciated and educational services for students with language and learning disabilities are fragmented as a result This unique book a multidisciplinary collaboration bridges research practice and the development of new technologies It offers the first comprehensive and integrated overview of the multiple factors involved in language learning from late preschool through post high school that must be considered if problems are to be effectively addressed Practitioners researchers and students professionally concerned with these problems will find the book an invaluable resource Developing Reading and Writing in Second-Language Learners Diane August, Timothy Shanahan, 2007-10-10 A Co Publication of Lawrence Erlbaum Associates Inc and The International Reading Association This book is a shorter version of the full volume Developing Literacy in Second Language Learners reporting the findings of the National Literacy Panel on Language Minority Children and Youth The Panel a distinguished group of expert researchers in reading language bilingualism research methods and education was appointed to identify assess and synthesize research on the literacy education of language minority children and youth In this book chapters adapted from the original report concisely summarize what is known from empirical research about the development of literacy in language minority children and youth including development environment instruction and assessment Using Reading to Teach a World Language Donna Spangler, John Alex Mazzante, 2015-02-11 To help your students learn a world language don't forget the power of reading In this practical book from Donna Spangler and John Alex Mazzante you'll gain a variety of strategies and activities

Language Awareness and Learning to

Read J. Downing, R. Valtin, 2012-12-06 During the 1970s there was a rapid increase in interest in metacognition and metalinguistics. The impetus came from linguistics, psychology and psycholinguistics. But with rather unusual rapidity the work from these scientific disciplines was taken over in education. This new direction in these various areas of academic study was taken simultaneously by several different investigators. Although they had varying emphases, their work sometimes appears to be overlapping. Despite this, it has been rather difficult to find a consensus. This is reflected in the varying terminology used by these independent investigators: linguistic awareness, metacognition, metalinguistic ability, task awareness, lexical awareness and so on. For educators, these developments presented a glittering array of new ideas that promised to throw light on children's thinking processes in learning how to read. Many reading researchers and graduate students have perceived this as a new frontier for the development of theory and research. However, the variety of independent theoretical approaches and their accompanying terminologies has been somewhat confusing.

English Language Learning

Materials Brian Tomlinson, 2008-03-17 This research collection presents a critical review of the materials used for learning English around the world. The first section includes a discussion of materials for specific learners and purposes such as young learners, self-study, academic writing and general proficiency. The second section presents a detailed study of the materials used in Europe, Asia, North America, South America, Africa and Australia and critically evaluates their effectiveness in the teaching of English to speakers of other languages. Taking both the teacher's and the learner's needs into consideration, the book makes a positive contribution to the future of research in materials development and has practical applications. This comprehensive critical analysis of materials in use around the world will be useful for academics researching materials development and applied linguistics and for students on postgraduate applied linguistics and ELT courses.
