Popular Culture Theory and Methodology Harold E. Hinds, Marilyn Ferris Motz, Angela M. S. Nelson, 2006 Since its birth in the 1960s the study of popular culture has come a long way in defining its object its purpose and its place in academe Emerging along the margins of a scholarly establishment that initially dismissed anything popular as unworthy of serious study trivial formulaic easily digestible escapist early practitioners of the discipline stubbornly set about creating the theoretical and methodological framework upon which a deeper understanding could be founded Through seminal essays that document the maturation of the field as it gradually made headway toward legitimacy *Popular Culture Theory and Methodology* provides students of popular culture with both the historical context and the critical apparatus required for further growth For all its progress the study of popular culture remains a site of healthy questioning What exactly is popular culture How should it be studied What forces come together in producing disseminating and consuming it Is it always conformist or has it the power to subvert refashion resist and destabilize the status quo How does it differ from folk culture mass culture commercial culture Is the line between high and low merely arbitrary Do the popular arts have a distinctive aesthetics This collection offers a wide range of responses to these and similar questions Edited by Harold E Hinds Jr Marilyn F Motz and Angela M S Nelson *Popular Culture Theory and Methodology* charts some of the key turning points in the culture wars and leads us through the central debates in this fast developing discipline Authors of the more than two dozen studies several of which are newly published here include John Cawelti Russel B Nye Ray B Browne Fred E H Schroeder John Fiske Lawrence Mintz David Feldman Roger Rollin Harold Schechter S Elizabeth Bird and Harold E Hinds Jr A valuable bibliography completes the volume

Science Fiction and the Mass Cultural Genre System John Rieder, 2017-03-07 A fresh approach to the history and shape of science fiction In *Science Fiction and the Mass Cultural Genre System* John Rieder asks literary scholars to consider what shape literary history takes when based on a historical rather than formalist genre theory Rieder starts from the premise that science fiction and the other genres usually associated with so called genre fiction comprise a system of genres entirely distinct from the pre existing classical and academic genre system that includes the epic tragedy comedy satire romance the lyric and so on He proposes that the field of literary production and the project of literary studies cannot be adequately conceptualized without taking into account the tensions between these two genre systems that arise from their different modes of production distribution and reception Although the careful reading of individual texts forms an important part of this study the systemic approach offered by *Science Fiction and the Mass Cultural Genre System* provides a fundamental challenge to literary methodologies that foreground individual innovation

toward a genuine understanding of science how H G Wells first showed the possibilities of combining scientific and humanistic perspectives how writers influenced by Gernsback's ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners

Race in American Science Fiction Isiah Lavender, 2011-02-08 A critical examination of Blackness and race in the predominantly White genre Noting that science fiction is characterized by an investment in the proliferation of racial difference Isiah Lavender III argues that racial alterity is fundamental to the genre's narrative strategy Race in American Science Fiction offers a systematic classification of ways that race appears and how it is

silenced in science fiction while developing a critical vocabulary designed to focus attention on often overlooked racial implications. These focused readings of science fiction contextualize race within the genre's better known master narratives and agendas. Authors discussed include Isaac Asimov, Ray Bradbury, Philip K. Dick, and Ursula K. Le Guin among many others. Critically ambitious Isiah Lavender spurs a direct conversation about race and racism in science fiction. De Witt Douglas Kilgore, author of *Astrofuturism: Science, Race, and Visions of Utopia in Space*, *Science Fiction, Canonization, Marginalization, and the Academy*. Gary Westfahl, George Slusser, 2002-01-30. Science fiction occupies a peculiar place in the academic study of literature. For decades, scholars have looked at science fiction with disdain and have criticized it for being inferior to other types of literature. But despite the sentiments of these traditionalists, many works of science fiction engage recognized canonical texts such as the *Odyssey*, and many traditionally canonical works contain elements of science fiction. More recently, the canon has been subject to revision as scholars have deliberately sought to include works that reflect diversity and have participated in the serious study of popular culture. But these attempts to create a more inclusive canon have nonetheless continued to marginalize science fiction. This book examines the treatment of science fiction within the academy. The expert contributors to this volume explore a wide range of topics related to the place of science fiction in literary studies. These include academic attitudes toward science fiction, the role of journals and cultural gatekeepers in canon formation, and the marginalization of specific works and authors by literary critics. In addition, the volume gives special attention to multicultural and feminist concerns. In discussing these topics, the book sheds considerable light on much broader issues related to the politics of literary studies and academic inquiry. *Modern Science Fiction: A Critical Analysis*. James Gunn, Michael R. Page, 2018-05-25. James Gunn, one of the founding figures of science fiction scholarship and teaching, wrote in 1951 what is likely the first master's thesis on modern science fiction. Portions were in the short-lived pulp magazine *Dynamic*, but it has otherwise remained unavailable. Here, in its first full publication, the thesis explores many of the classic Golden Age stories of the 1940s and the critical perspective that informed Gunn's essential genre history *Alternate Worlds* and his anthology series *The Road to Science Fiction*. The editor's introduction and commentary show the historical significance of Gunn's work and its relevance to today's science fiction studies.
