Long Way To Europe Historical Observations From A Contemporary View:

The Long Way to Europe Wolfgang J. Mommsen, 1994 Prominent historians from Eastern and Western Europe speculate on the political and economic future of the continent The Social Construction of Europe Thomas Christiansen, Knud Erik Jørgensen, Antje Wiener, 2001-06-01 This book is the first to systematically introduce and apply a social constructivist perspective to the study of European integration Social constructivism is carefully located in terms of its philosophical and methodological origins The wider debates and contribution of constructivist approaches to international relations are reviewed and the insights that might then be afforded to European studies fully explored Highlights include new theoretical contributions to the debate by Ernst B Haas Andrew Moravcsik and Steve Smith research on key aspects of European integration and EU governance applying a variety of constructivist approaches The Social Construction of Europe provides new and important in Europe and the Other and Europe as the Other Bo Stråth, 2010 This book contributes to the debate on what Europe means by demonstrating the complexities and contradictions inherent in the concept They are seen most clearly when Europe is viewed from a long historical perspective During the closing decades of the twentieth century Europe emerged as one of the main points of reference in both the cultural and the political constructs of the global community An obsession with the concept of European identity is readily discernible This process of identity construction provokes critical questions which the book aims to address At the same time the book explores the opportunities offered by the concept of Europe to see how it may be used in the construction of the future The approach is one of both deconstruction and reconstruction The issue of Europe is closely related in the book to more general issues concerning the cultural construction of community The book should therefore be seen as the companion of Myth and Memory in the Construction of Community which is also published by PIE Peter Lang in the series Multiple Europes The book appears within the framework of a research project on the cultural construction of community in modernisation processes in comparison This project is a joint enterprise of the European University Institute in Florence and the Humboldt University in Berlin sponsored by the Bank of Sweden Tercentenary Fund **War and Diplomacy in East and West** M. B. B. Biskupski, 2017-05-12 The New York Times said of J zef Hieronim Retinger that he was on intimate terms with most leading statesmen of the Western World including presidents of the United States He has been repeatedly acknowledged as one of the principle architects of the movement for European unity after the World War II and one of the outstanding creative political influences of the post war period He has also been credited with being the dark master behind the so called Bilderberg Group described variously as an organization of idealistic internationalists and a malevolent global conspiracy Before that Retinger involved himself in intelligence activities during World War II and given the covert and semi covert nature of many of his activities it is little wonder that no biography has appeared about him This book draws on a broad range of international archives to rectify that
