Longevity And Quality Of Life:

Longevity and Quality of Life Robert N. Butler, Claude Jasmin, 2000-04-30 Nations around the world are experiencing a spectacular increase in longevity. Society as a whole is being challenged by issues arising from this revolution in longevity. Although the specter of the loneliness and existential suffering of older citizens is such that some people under the age of 65 find it difficult to conceive of a long term future, persons over 85 have proven that aging does not necessarily preclude a healthy and productive life. Extraordinary progress in both curative and preventive medicine justifies optimism about the quality of life and state of well being that can be enjoyed even in great old age. We should look to professionals in diverse fields to develop creative solutions to the inevitable issues that will arise with aging. Governments must prepare for the future health of their citizens by making long term investments to educate all sectors of society in the value of good nutrition, exercise, and lifestyles that enhance well being throughout life. Also, governments should realize that the main cause of health care expenditure is serious illness which occurs in persons of all ages and not predominantly in older people. Early detection can help save lives as well. Health and longevity of life will ultimately end as a political issue. What is needed is long term government investments necessary for a viable health policy. The question arises: will world leaders be able to commit to such a policy? Two major socioeconomic phenomena may have a regulating effect on this issue. The first is the emergence of pressure groups that have come into being in response to a particular health issue such as AIDS. The second is the emergence of ethics committees in developed nations that deal solely with health issues.

The Longevity Revolution

Robert N. Butler, 2009-09-08 Pulitzer prize winning author Dr Robert Butler coined the term ageism and made Alzheimer's a familiar word. Now he brings his formidable knowledge and experience in aging issues to a recent and unprecedented achievement: the extension of human life expectancy by thirty years. As Butler shows, our society had not yet adapted to this change. The U.S. has not made a research investment in aging. Only eleven medical schools out of 145 have geriatrics departments compared to England where geriatrics is the number two specialty. We have not solidified private pension plans or strengthened Social Security to ensure that people do not outlive their resources. In this urgent and ultimately optimistic book, Dr Butler shows why and how we must re-examine our personal and societal approach to aging right now so that the boomers and the generations that follow may have a financially secure, vigorous, and healthy final chapter of life.

diversification and risk management strategies Prospective Longevity Warren C. Sanderson, Sergei Scherbov, 2019-11-19 From two leading experts a revolutionary new way to think about and measure aging Aging is a complex phenomenon We usually think of chronological age as a benchmark but it is actually a backward way of defining lifespan It tells us how long we've lived so far but what about the rest of our lives In this pathbreaking book Warren C Sanderson and Sergei Scherbov provide a new way to measure individual and population aging Instead of counting how many years we've lived we should think about the number of years we have left our prospective age Two people who share the same chronological age probably have different prospective ages because one will outlive the other Combining their forward thinking measure of our remaining years with other health metrics Sanderson and Scherbov show how we can generate better demographic estimates which inform better policies Measuring prospective age helps make sense of observed patterns of survival reorients understanding of health in old age and clarifies the burden of old age dependency The metric also brings valuable data to debates over equitable intergenerational pensions Sanderson and Scherbov's pioneering model has already been adopted by the United Nations Prospective Longevity offers us all an opportunity to rethink aging so that we can make the right choices for our societal and economic health *The Economics of Environmental Risk* V. K. Smith, 2022-12-13 Featuring real world examples of how risk information affects public choices The Economics of Environmental Risk expertly demonstrates that policymakers need to consider how people learn about those risks Offering insights into examples such as hazardous waste radon smoking hurricanes and terrorist threats over the past four decades this intuitive book illustrates environmental risks and the choices made to mitigate the potential effects **Multidimensional Approach to Quality of Life Issues** Braj Raj Kumar Sinha, 2019-08-27 This comprehensive volume provides a broad overview of quality of life issues covering a wide geographical region North America Europe parts of Africa East Asia and South Asia Spread over more than 25 chapters it includes the latest findings from these regions to provide a multidisciplinary account of the major dimensions of quality of life and therefore has a vast scope The volume is divided into four thematic parts theoretical dimension Demographic dimension socio cultural and economic dimensions and urban and environment related dimensions Extensive maps diagrams and tables accompany the discussions and facilitate understanding This is an indispensable reference and serves the interest of students and scholars of human geography economics demography sociology anthropology social work and philosophy It is particularly useful for those engaged in further research on quality of life issues Cognitive Capitalism Heiner Rindermann, 2018-02-15 Nations can vary greatly in their wealth democratic rights and the wellbeing of their citizens These gaps are often obvious and by studying the flow of immigration one can easily predict people's wants and needs But why are there also large differences in the level of education indicating disparities in cognitive ability How are they related to a country's economic political and cultural development Researchers in the paradigms of economics psychology sociology evolution and cultural studies have tried to find answers for these hotly debated issues In this book Heiner Rindermann

establishes a new model the emergence of a burgher civic world supported by long term background factors furthered education and thinking The burgher civic world initiated a reciprocal development changing society and culture resulting in past and present cognitive capital and wealth differences This is an important text for graduate students and researchers in a wide range of fields including economics psychology sociology and political science and those working on economic growth human capital formation and cognitive development
