Selving Irene Fast,2013-05-13

In *Selving A Relational Theory of Self Organization* Irene Fast invokes the basic distinction between the self as me and the self as I in order to develop a contemporary theory of the self as subject In a return to Freud s clinical finding that all psychological processes are personally motivated she elaborates a notion of the I self that is intrinsically dynamic and relational Within this conception our perceiving thinking feeling and acting are not what our self does rather they are what our self is According to Fast the basic unit of the dynamic I self of selving is a scheme of personally motivated interaction between self and nonself This notion which comprehends development and developmental failure as a product of integration and differentiation among discrete I schemes provides a radically new framework for understanding those dynamic phenomena that Freud included within his structural model of the mind and that contemporary theorists have addressed within object relational perspectives Via the notion of selving Fast likewise brings fresh insight to a host of issues that have engaged psychoanalysts and developmental psychologists in recent years These topics include the place of bodily experience in a relational model of mind the organization of self as simultaneously individual and relational the formulation of a constructivist model of psychic structure among others Selving is not only a lucid demonstration of how a relational theory of self can reorder clinical observations in conceptually and therapeutically illuminating ways It is also a convincing demonstration of how a constructivist model emphasizing the interactive nature of meaning making provides bridges to Piagetian theory developmental research and observational infancy studies
