Mark Creasy

Look Listen Think Middle Primary:

Building Blocks for Learning Occupational Therapy Approaches Jill Jenkinson, Tessa Hyde, Saffia Ahmad, 2008-11-20

Building Blocks for Learning Occupational Therapy Approaches is a resource book for educational staff and pediatric occupational therapists especially those new to the field. It shows how the implications of physical, psychological, social, and learning difficulties impact upon children's abilities. This highly practical book will help readers recognize when a student's poor performance within the classroom is a result of a medical condition or underlying motor and perceptual deficits.

Metacognition in the Primary Classroom Peter Tarrant, Deborah Holt, 2016-01-08. Current trends in education suggest that pupils should have more responsibility for their own learning, but how can they if they don't understand the what, the why, and the how? This practical guide explores the idea that a metacognitive approach enables pupils to develop skills for lifelong learning. If pupils can identify the what, the why, and the how of their learning, they can begin to formulate strategies for overcoming challenges and for continuous improvement. In this book, the authors truly engage with research into the link between metacognition and learning and the idea that if you can effectively articulate your thoughts and strategies regarding how you learn, you might then be in a better position to take actions in order to improve and to be able to learn best. An appendix of useful resources is also included, which offers a range of activities surrounding the language of learning, reflection, and metacognition, as well as essential advice on how to develop metacognition in the early years (4-8), middle years (8-10), and upper years (10-13). *Metacognition in the Primary Classroom* demonstrates how important it is for children to be well enough informed to play an active role in learning better. Having the language skills to talk about your learning and the opportunity to share ideas and strategies with others enables all concerned to explore and develop approaches in order to learn better. This book is a crucial read for anyone interested in ensuring that pupils take an active role in their own learning.

Using Internet Primary Sources to Teach Critical Thinking Skills in Visual Arts Pamela J. Eyerdam, 2003-03-30. Use the Internet to teach visual arts and refine students' critical thinking skills. This book is based on the Discipline Based Art Education program, a proven art instruction program that teaches everything from the creative process and art history to criticism and aesthetics. An abundance of primary source web sites and background information is offered. The main focus of the book is western art history and painting, but examples of sculpture, drawings, prints, and architecture are included, along with a chapter on diversity. Part I provides background material: a brief history of art education is presented, followed by a review of the components of design elements and principles. The book describes using the Internet as a primary source by identifying and evaluating websites. Part II follows the program through the main historical periods from prehistoric and ancient Middle Eastern art through the Renaissance through the 20th century. A bibliography and index are included.

Independent Thinking on Primary Teaching Mark Creasy, 2022-02-01. Foreword by Ian Gilbert. Primary school teachers are working harder than ever and have more and more to do in the finite time they have with their pupils, but Mark Creasy

believes it doesn't need to be like this. With rare experience in both primary and secondary phases and at leadership as well as classroom levels, Mark is ideally placed to comment on what works and what doesn't, and in this book he urges teachers to recognise that there is another way. In *Independent Thinking on Primary Teaching*, Mark encourages teachers to stop and consider the things they do daily in the classroom and presents a series of prompts, nudges and suggestions to help them achieve the same or even better results by working smarter, not harder. In so doing, he shares a wealth of practical and easily transferable tips for immediate use in the classroom, all designed to streamline teachers' schedules and lighten their workload while enlivening children's learning. These are in no way doctrines or silver bullets for success, and nothing that Mark advocates requires further investment of either time or money; rather, these 'working smarter' tips are geared to win teachers their evenings and weekends back, something that many more teachers need than is healthy for the profession. Essential reading for primary school teachers, *Independent Thinking on Primary Teaching* is one of a number of books in the

Independent Thinking On series from the award-winning Independent Thinking Press. **100 Ideas for Primary Teachers:**

Oracy Topsy Page, 2024-07-18. No matter what you teach, there is a 100 Ideas title for you. The 100 Ideas series offers teachers practical, easy-to-implement strategies and activities for the classroom. Each author is an expert in their field and is passionate about sharing best practice with their peers. Each title includes at least ten additional extra creative Bonus Ideas that won't fail to inspire and engage all learners. Combining clear practical advice and tried and tested strategies, *100 Ideas for Primary Teachers: Oracy* is the essential handbook to making every child in your class a confident communicator. Oracy expert, consultant and teacher Topsy Page presents 100 easy-to-implement ideas directly from the classroom, engaging everyone from the quiet child in your class to pupils with SEND or EAL, in a variety of pair, group and whole-class talk activities and approaches. Discover inspiring yet simple strategies to get your pupils talking, as well as ways to improve your questioning, Teacher Talk and online communication in hybrid learning. Oracy is increasingly thought to be a core skill to be taught at school, key for improving personal outcomes and for future success. Clear communication is critical for developing critical thinking skills, confidence and attainment across the curriculum, especially after years of Covid-19 related disruption. Including tips for teachers, pupil talk prompts and ideas such as talk towers, this collection of tips, games and activities links directly to the National Curriculum and offers strategies to improve oracy for individual pupils, classes and the whole school. Written by experts in their field, the 100 Ideas books offer practical ideas for busy teachers. They include step-by-step instructions, teaching tips and 'taking it further' ideas. Follow the conversation on Twitter using #100Ideas. **How to be an**

Outstanding Primary Middle Leader Zoë Paramour, 2018-11-01. *How to be an Outstanding Primary Middle Leader* is a compendium of research, advice, anecdotes and practical tips to help middle leaders excel in this complex and demanding role without compromising their mental or physical health. Written by Zoë Paramour, experienced middle leader and award-winning blogger of *The Girl on the Piccadilly Line*, this book provides advice and practical solutions to challenges middle leaders are

likely to encounter while leading a subject phase or other whole school responsibility from having difficult conversations with colleagues and parents to dealing with an Ofsted inspector and writing a school improvement plan All advice is drawn from Zo's own experiences as a middle leader interviews and conversations with middle and senior leaders as well as research into leadership In Zo's unique straight talking and witty style this book is an accessible and enjoyable read for both new and experienced primary middle leaders looking to reflect on their practice and maximise their impact

Evaluating Transition to School Programs Sue Dockett, Bob Perry, 2021-10-21 Transition to school represents a time of great change for all involved Many transition to school programs have been developed to support positive transitions to school While these programs have involved complex planning and implementation often they have not been evaluated in rigorous or systematic ways This book brings together Australian and international perspectives on research and practice to explore approaches to evaluating transition to school programs For children school is quite different from anything else they have experienced For families and educators there are considerable changes as they interact with new people and take on new roles Developing effective transition to school programs is a key policy initiative around the world based on recognition of the importance of a positive start to school and the impact of this for future school engagement and outcomes Throughout the chapters of this book authors from Australia Germany Sweden Ireland and Jamaica share examples of evaluation practice with the aim of encouraging educators to reflect on their own contexts and adopt evaluation practices that are relevant and appropriate for them The book brings together the fields of evaluation research and transition to school A wide range of examples and figures is used to relate research and practice and to illustrate possible applications of evaluation strategies Evaluating Transition to School Programs highlights the importance of multiple perspectives of the transition to school and offers suggestions about how the perspectives of children families educators and community members might be included and analysed in evaluation strategies Other themes throughout the book include the importance of collaboration respectful and trusting relationships practitioner driven inquiry strengths based approaches and developing programs that are responsive to context This book is written for educators and leaders in early years and primary school settings and will also be of interest to researchers students and policy makers in the field

The Middle Works, 1899-1924 John Dewey, 1976

Normal Instructor and Primary Plans, 1926
