O'Gara,2011-04-20 The Wind River runs from the alpine lakes of the Continental Divide through the nestled valleys of the northern Rocky Mountains and out onto high windblown plains More than a century ago in what would become Wyoming the federal government set aside 44 million acres on which to confine the unrelated Shoshone and Arapaho tribes By now the Wind River Reservation has been reduced to 2 3 million acres but the battle over control of this land and especially the river that runs through it is far from over In this magnificent watershed Geoffrey O Gara a touching wise and penetrating writer according to Edward Hoagland sets a remarkable story that illuminates the larger unfinished struggle for the heart of the

West He ranges from the Indian wars to the present day and from the nineteenth century Shoshone chief Washakie to his great grandson now head of the tribal council and he also traces the complex legal struggle over water rights for generations monopolized by white farmers for irrigation that after two decades is still unresolved At the heart of O Gara s account are the citizens of Wind River itself the people on the various sides of the many complex conflicts the tragedy and resilience of the nine thousand Shoshone and Arapaho contending with the depredations of reservation life and the indifference of those who first took their land and have gradually assumed control of their water In all this is a powerful moving story of great relevance and guarded promise of nations with different languages cultures and birthrights still searching for a way to live together

*The Practical Angler. By Piscator* Edmund Goldsmid,1842 **Water and the Search for Life on Mars** David M. Harland,2007-09-24 Mars has long been believed to have been cold dead and dry for aeons but there is now striking new proof that not only was Mars a relatively warm and wet place in geologically recent times but that even today there are vast reserves of water frozen beneath the planet s surface As well as casting fascinating new insights into Mars past this

discovery is also forcing a complete rethink about the mechanisms of global planetary change and the possibility that there is microbial life on Mars David Harland considers the issue of life on Mars in parallel with the origin of life on Earth At the time the Viking instruments were designed it was thought that all terrestrial life ultimately derived its energy from sunlight and that the earliest form of life was the cyanobacteria with chlorophyll for photosynthesis It was assumed the same would be the case on Mars and that microbial life would be on or near the surface that the Vikings had sampled In parallel with these NASA projects the European Space Agency developed the Mars Express remote sensing orbiter which has detected traces of methane that may have been released by microbes If microbial life is found on Mars will it be based on DNA Will this indicate that life developed independently Or that it has characteristics in common with the most ancient forms of terrestrial life If life is found on two planets in the same planetary system this would favour the panspermia hypothesis And if martian life is radically different then in light of the discovery of planetary systems around other stars this would as remarked by Philip Morrison of MIT transform life from the status of a miracle to that of a statistic These are all questions that the exploration of Mars for life are aimed to answer

These tales from the author's life experiences are mostly light-hearted but they are all true. They start with Nellie the dinghy who eventually became the long red sleek speedboat named The Phantom. Some of the tales also involve the caravan that the author's father bought when Borry was thirteen years old. The family spent almost every weekend from March to October at St Lawrence Bay in the wilds and farmlands of Essex by the River Blackwater with recurring battles against screaming winkles, the bog of eternal stench and the evil mud-sucking monster. Fun and frolics ensued for over forty-eight years. **Salt Water** William H. G. Kingston, 2010. Reprint of the adventure novel originally released in 1857. *Geological Survey Water-supply Paper*, 1970.
