Looking For Answers Conversations On Art And Science:

Looking for Answers Ernst Hans Gombrich, Didier Eribon, 1993 People know me as the author of *The Story of Art* who have never heard of me as a scholar But many of my colleagues have never read the book They may have read my papers on Poussin or Leonardo but not that It is a curious double life Sir Ernst Gombrich is one of the very few men able to lead such a double life as familiar to the general public as to academicians Recently the French intellectual Didier Eribon engaged in a series of probing conversations with Gombrich seeking to discover how his mind and attitudes had been formed during his early years in Vienna and how they developed after he emigrated to England in 1939 There Gombrich wrote *The Story of Art* his acclaimed introductory art survey and became director of the Warburg Institute in London The result of the dialogue between these two men is found in this fascinating and thought provoking volume Gombrich tells of reading examining pondering and talking to numerous historians psychologists artists and philosophers among them Erwin Panofsky Karl Popper Oskar Kokoschka and Konrad Lorenz about subjects ranging from art history to biology and zoology The reader observes one of our century's most acute minds as he informally brings together all the themes that have preoccupied him for over sixty years the meaning of paintings especially those of the Renaissance the relation between representational art and perception and the way in which our responses are conditioned by conventions history social pressures and changes of taste As undogmatic skeptical and wide ranging as ever Gombrich not only provides a brilliant account of his life's work but also makes us think anew about fundamental issues provoking as many questions as he answers

Psychology, Art, and Antifascism Louis Rose, 2016-09-15 A vivid portrait of two remarkable twentieth century thinkers and their landmark collaboration on the use and abuse of caricature and propaganda in the modern world In 1934 Viennese art historian and psychoanalyst Ernst Kris invited his mentee E H Gombrich to collaborate on a project that had implications for psychology and neuroscience and foreshadowed their contributions to the Allied war effort Their subject caricature and its use and abuse in propaganda Their collaboration was a seminal early effort to integrate science the humanities and political awareness In this fascinating biographical and intellectual study Louis Rose explores the content of Kris and Gombrich's project and its legacy
