Construction of Chinese Nationalism in the Early 21st Century Suisheng Zhao, 2014-07-25 Chinese nationalism is powered by a narrative of China's century of shame and humiliation in the hands of imperialist powers and calls for the Chinese government to redeem the past humiliations and take back all lost territories The continuing surge of Chinese nationalism in the early 21st century therefore has fed a roiling sense of anxiety in many political capitals about whether a virulent nationalism has emerged to make China rise anything but peaceful This book addresses this anxiety by examining the domestic sources and foreign policy implications of Chinese nationalism in the early 21st century It is divided into three parts Part I is an overview of the scholarly debate about if the rise of Chinese nationalism has driven China's foreign policy in a more irrational and inflexible direction in the first one and half decades of the 21st century Part II analyzes the construction of Chinese nationalism by a variety of domestic forces including the communist state the angry youth fen qing liberal intellectuals and ethnic groups Part III explores whether Chinese nationalism is affirmative assertive or aggressive through the case studies of China's maritime territorial disputes with Japan in the East China Sea and with several Southeast Asian countries in the South China Sea the border controversy over the ancient Koguryo with Korea and the cross Taiwan Strait relations This book was based on articles published in the Journal of Contemporary China

Rothwell,W. S. Walter Samuel Grono Bateman,2000-11-14 Navigational rights and freedoms have been central to the development of the law of the sea since the original debates over whether the seas were open or closed to maritime traffic The 1982 UN Convention on the Law of the Sea recognises the legitimate rights of coastal states to proclaim sovereignty and assert jurisdiction over vast areas of maritime space In return maritime states are given a range of navigational rights over waters ranging from the territorial sea through to the high sea The new regime of the law of the sea created by the Convention presents an opportunity to review developments in the law of navigational rights and freedoms This book assesses the navigational regime established by the 1982 Convention with emphasis given to the continuing importance of the freedom of the seas Navigation in the territorial sea and international straits is reviewed especially in the Straits of Malacca and Singapore and the Torres Strait Archipelagic navigation from the perspective of two claimant states Indonesia and the Philippines and a user state South Korea is also considered The interaction of environmental concerns with navigational rights is an important feature of the current law of the sea regime with relevant conventions assessed and the role of the International Maritime Organization in developing navigational standards considered Both European and

Canadian practice in the protection of sensitive marine environments and the impact upon navigational rights is also considered Finally the roles of the International Tribunal for the Law of the Sea and the International Maritime Organization in dispute resolution are reviewed before a concluding consideration of the future for navigational rights and freedoms in the twenty first century *Trajectory of the 21st Century* Lawrence J. Terlizze,2009-01-10 Trajectory of the Twenty first Century explores what many prophets of the twentieth century such as Oswald Spengler Paul Tillich Aldous Huxley Jacques Ellul and others have predicted would transpire in the current century Their vision included an out of control technological system and a return to religious sentiment that will ultimately undermine the system to which it is reacting This book aims to accurately present their positions and draw certain logical conclusions from them that pertain to the course of history in our time The book s theme argues that modernity is a secularized version of millennial Christianity which reaches its fullest development in the twenty first century and will regress into what Russian philosopher Nicholas Berdyaev called the new Middle Ages or a new religious period This will mean the twilight of modern technological society as its values of rationalism give way to a post-rationalist society Ironically decline will come through further technological advance Omnicide threatens through religious world war driven by transcendent values and modern weaponry Jihadist thinking and posthumanist technology both establish the omnicidal mentality New technologies such as genetic engineering and artificial intelligence created under millennial inspiration to reach for immortality could potentially bring an end to the human species either through a slow steady obsolescence or through environmental catastrophe The titanic forces of technological progress and regress are on a direct collision course in the twenty first century *Congressional Record* United States. Congress,1997 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 **The U.S.-South Korean Alliance** Doug Bandow,Ted Galen Carpenter,1992-01-01 The inconclusive outcome of the Korean War left a peninsula divided between two nations engaged in a deadly cold war An important aspect of the continuing hostilities was America s security guarantee to South Korea Despite enormous geopolitical changes brought by the accelerating collapse of communism the United States has a standing pledge to go to war if necessary to thwart a North Korean attack This volume assesses the current and future viability of the U S South Korean alliance from military political and economic perspectives Future Energy Conferences and Symposia ,1990 Confronting The Challenges Of The 21st Century - Proceedings Of The Forty-ninth Pugwash Conference On Science And World Affairs Joseph Rotblat,2001-10-29 In September 1999 scientists and scholars from around the world concerned with reducing the danger of armed conflict and seeking cooperative solutions to global problems met under the auspices of the Pugwash conferences the Nobel Prize winning organization The proceedings deal with a broad range of issues including a
