Lindy Scott, 2017-11-03 Corruption The mere word brings up negative and all too prevalent images in our minds: bribes, abuse of power and favoritism among our political leaders, business leaders and even among our religious leaders. It is commonplace for Christians to rail against rampant corruption and lament its existence. What is not so common is to hear a thoughtful analysis of the factors that lead to and feed corruption. Even more scarce are practical and proven steps that we can take to reduce the levels of corruption in our societies. With these thoughts in mind, the Fraternidad Teologica Latinoamericana invited Christian leaders to tackle this issue head on at an international conference titled Corruption Kills: Biblical Contextual and Ethical Perspectives. Held in Lima, Peru from July 23-25, 2016, participants gave presentations that ranged from biblical and theological analysis of corruption to practical experiences of fighting it. Though our hearts are heavy due to the subject matter, it is our privilege to share with you in this issue of the Journal of Latin American Theology some of the key presentations of that conference.

The Social Life of Numbers Gary Urton, Primitivo Nina Llanos, 2010-07-05 Unraveling all the mysteries of the khipu, the knotted string device used by the Inka to record both statistical data and narrative accounts of myths, histories and genealogies will require an understanding of how number values and relations may have been used to encode information on social, familial and political relationships and structures. This is the problem Gary Urton tackles in his pathfinding study of the origin, meaning and significance of numbers and the philosophical principles underlying the practice of arithmetic among Quechua speaking peoples of the Andes. Based on fieldwork in communities around Sucre in south central Bolivia, Urton argues that the origin and meaning of numbers were and are conceived of by Quechua speaking peoples in ways similar to their ideas about and formulations of gender, age and social relations. He also demonstrates that their practice of arithmetic is based on a well articulated body of philosophical principles and values that reflects a continuous attempt to maintain balance, harmony and equilibrium in the material, social and moral spheres of community life.
