United States. Congress. House,2005 *News*,2005 *AMERICAN INTERNATIONAL LAW CASES Fourth Series 2009 VOLUME 2* Oceana Editorial Board,2010-12-24 AILC is an annual case law reporter that provides the full text of U S court opinions involving international law issues. The courts covered include all U S federal district courts federal appellate courts and the U S Supreme Court as well as some state courts the U S Court of Claims the U S Court of International Trade and the U S Tax Court. The series seeks to provide not every single case in which a court refers to international law but rather all cases that analyze at least one international law issue in depth. The list of subjects addressed by these volumes is vast and changes from year to year with the inclusion and prominence of most topics turning on their prevalence in a given year's jurisprudence. Some consistently prominent topics are personal jurisdiction over foreign defendants deportation procedure and double taxation. Over the last three editions 2006 2007 and 2008 many topics have developed rapidly and constitute a correspondingly larger portion of the volumes particularly Terrorism the Foreign Sovereign Immunities Act Forum Non Conveniens and an entirely new added topic the National Security Exception to deportation eligibility. The 2008 edition of AILC also features expanded sections on family law and on the detention of terrorist suspects. The U S war on terror and the crisis at Guantanamo have made that last topic a significant and dynamic component of AILC. Each edition of AILC also comes framed with two practical resources for students and scholars. The first is an introductory editor's note that both reviews international law's major developments for the given year and explains to readers how to use the volumes. The second is a subject index to allow for targeted research. Volume Two of AILC consists of cases concerning territories trusteeships boundaries and navigable waters covering marine torts and crimes and death on the high seas by wrongful act. Also covered are procedural aspects including in personam jurisdiction extraterritoriality and forum selection clauses. In *Atlantic Sounding Co Inc v Edgar L Townsend* the issue was whether an injured seaman may recover punitive damages for his employer's willful failure to pay maintenance and cure. The court ruled that punitive damages were available as a matter of general maritime law. The issue in *Jose Marcial Reyes Fuentes et al v Shannon Produce Farm Inc et al* was whether the Fair Labor

Standards Act's FLSA provision provides a cause of action to foreign workers located abroad who are denied rehire in retaliation for exercising their rights under the FLSA. The court ruled that neither the FLSA nor general extraterritoriality principles stand in the way of the plaintiffs' retaliation claim.

The Lost Millennium Florin Diacu, 2010-07-23 Have you ever wondered how we really know what year it is? Part detective story, part conspiracy theory, part scientific history, *The Lost Millennium* explores the astonishing possibility that our calendar is out by a thousand years. A chance conversation at a conference in Mexico started mathematician Florin Diacu on an amazing journey to make sense of one of the strangest and if true, most revolutionary theories you'll ever encounter. To understand how scientists could be sceptical about what year it is, Florin Diacu explores the fascinating history of chronology from Egyptian horoscopes to the work of Isaac Newton with cameos by Voltaire and Edmund Halley, making the startling discovery that our calendar is far from ironclad. It all depends rather on the dating of ancient events about which there is real controversy. At once accessible and profound, *The Lost Millennium* examines the arguments of present-day chronological revisionists such as the Russian scholar Anatoli Fomenko, who claims that our system of dating is horribly askew. Fomenko cites evidence from ancient astronomy, linguistics, and cartography and a crucial manuscript by Ptolemy staking his scientific prestige on a theory so controversial that it will change the way you think about time, history, and the calendar on your wall. The field has also inspired its share of now-discredited cranks such as Immanuel Velikovsky, a media celebrity of the 1950s. His notorious book *Worlds in Collision* argued that biblical events are incorrectly dated. Beautifully written and peopled with fascinating characters from past and present, *The Lost Millennium* is essential reading for anyone who believes they're living in the year 2005.

Lost 65.5 Hours in Olympic National Park Brian Gawley, 2009-07 Dean Rhodes Peninsula Daily News editor arrived at work at 9:30 a.m. on Tuesday Sept 13, 2005. At about 10:45 a.m. Dean looked up and asked inquisitively, "Where's Brian?" Fellow reporters Jim Casey and Raul Vasquez both stopped what they were doing, turned in unison to look at Brian's empty chair, turned back to Dean, and said they didn't know. They were wondering the same thing, especially since Brian hadn't been there Monday either. What do you mean he wasn't here Monday? Did he call in sick? Thus was set in motion the search and rescue effort that later was described as looking for a needle in a needlestack. The author says, "When I tell people about spending 65.5 hours lost in the wilderness in my running outfit with no food, the two questions I get most often are, 'Were you scared?' and 'Did you think you were going to die?'" The short answers are, "At the beginning and at the end, no." The longer answers, I hope, I will provide to your satisfaction in the pages ahead.

Committee on Government Reform. Subcommittee on Criminal Justice, Drug Policy, and Human Resources, 2006 **Eden Within Eden** James J. Kopp, 2009 Oregon has been the home of nearly three hundred communal experiments since the Aurora Colony was established in 1856. *Eden Within Eden* is the first book to survey the state's utopian history from religious and Socialist groups of the nineteenth century to ecologically conscious communities of the twenty-first century. James J. Kopp examines Oregon's communal history in the context of the state as a destination for those seeking new beginnings and in the framework of utopian and communal experiences across America. *Eden Within Eden* provides rich detail about utopian communities, some realized, some only planned, many of which reflect broader social, political, economic, and cultural aspects of Oregon's history. From the dawn of communal groups in Oregon, the German Christian colony at Aurora to Oregon's most infamous communal experiment, Rajneeshpuram, this study examines the range of attempts to establish ideal communities in the state. These include the Jewish agrarian colony of New Odessa in the 1880s as well as the new pioneers of the 1960s and later who captured the spirit of the counterculture as well as growing concerns about the environment. The book explores other areas of Oregon's utopian heritage as well, including literary works and idealistic city planning. There has been no comparable book published on Oregon's communal history, and few such comprehensive examinations of other states. The appendix is a rich compilation that will guide individuals to additional information on the profiled and many other communities. *Eden Within Eden* will appeal to students and scholars of communal studies and Pacific Northwest history as well as to general readers interested in these subjects. **Drill Pipe and Drill Collars from China, Invs. 701-TA-474 and 731-TA-1176 (Preliminary)** , *Edward I's Regent* Michael Ray, 2022-05-05 Born at Christmas 1249 to Richard Edmund of Cornwall was nephew to Henry III and cousin to Edward I. His eventful childhood took him to Germany when his father was elected king there. He was captured at the battle of Lewes and imprisoned for more than a year. Returning from crusade, he witnessed the brutal murder of his half brother, which left him as heir to his father, the richest man in the kingdom.

Throughout his life, Edmund played a crucial role in medieval England. As Regent of England, Earl of Cornwall, and the richest man in the land, he was a leading force of the late thirteenth century. This book considers Edmund's life, his use of his wealth to lend to the king and others, and to be a major benefactor of religious houses. His piety saw him found two new religious houses, rebuild another, and bring the Holy Blood relic from Germany to Hailes Abbey. His record as Regent of England for three years is assessed. The wide spread of his lands, which included 13 castles and more than 800 places in 27 counties, and his tenants are set out, as is his place in the local community. The basis of his wealth and its sources, including money from his lands but also from tin mining and marine dues in Cornwall, is explored, and his knightly affinity and his close associates and

officials are considered On a personal level the book examines his unsuccessful childless marriage with the sister of the Earl of Gloucester Edmund was a key figure throughout Edward I's reign and the late thirteenth century In this insightful account the man behind England's greatest king is at long last brought to the fore

Molecular Mechanisms of Microbial Evolution
Pabulo H. Rampelotto, 2018-10-12 One of the most profound paradigms that have transformed our understanding about life over the last decades was the acknowledgement that microorganisms play a central role in shaping the past and present environments on Earth and the nature of all life forms Each organism is the product of its history and all extant life traces back to common ancestors which were microorganisms Nowadays microorganisms represent the vast majority of biodiversity on Earth and have survived nearly 4 billion years of evolutionary change Microbial evolution occurred and continues to take place in a great variety of environmental conditions However we still know little about the processes of evolution as applied to microorganisms and microbial populations In addition the molecular mechanisms by which microorganisms communicate interact with each other and with multicellular organisms remains poorly understood Such patterns of microbe host interaction are essential to understand the evolution of microbial symbiosis and pathogenesis Recent advances in DNA sequencing high throughput technologies and genetic manipulation systems have enabled studies that directly characterize the molecular and genomic bases of evolution producing data that are making us change our view of the microbial world The notion that mutations in the coding regions of genomes are in combination with selective forces the main contributors to biodiversity needs to be re-examined as evidence accumulates indicating that many non-coding regions that contain regulatory signals show a high rate of variation even among closely related organisms Comparative analyses of an increasing number of closely related microbial genomes have yielded exciting insight into the sources of microbial genome variability with respect to gene content gene order and evolution of genes with unknown functions Furthermore laboratory studies i.e. experimental microbial evolution are providing fundamental biological insight through direct observation of the evolution process They not only enable testing evolutionary theory and principles but also have applications to metabolic engineering and human health Overall these studies ranging from viruses to Bacteria to microbial Eukaryotes are illuminating the mechanisms of evolution at a resolution that Darwin, Delbruck and Dobzhansky could barely have imagined Consequently it is timely to review and highlight the progress so far as well as discuss what remains unknown and requires future research This book explores the current state of knowledge on the molecular mechanisms of microbial evolution with a collection of papers written by authors who are leading experts in the field

Lost Ecstasy June McDaniel, 2018-06-26 This book is a study of religious ecstasy and the ways that it has been suppressed in both the academic study of religion and in much of the modern practice of religion It examines the meanings of the term how ecstatic experience is understood in a range of religions and why the importance of religious and mystical ecstasy has declined in the modern West June McDaniel examines how the search for ecstatic experience has migrated into such areas as war terrorism

transgression sexuality drug use and anti institutional forms of spirituality She argues that the loss of religious and mystical ecstasy as both a religious goal and as a topic of academic study has had wide ranging negative effects She also proposes that the field of religious studies must go beyond criminalizing trivializing and pathologizing ecstatic and mystical experiences Both religious studies and theology need to take these states seriously as important aspects of lived human experience
