Ways of Regulating Drugs in the 19th and 20th Centuries V. Hess, 2012-12-03

This collection takes the perspective that the historiography of science technology and medicine needs a broader approach toward regulation The authors explore the distinct social worlds involved in regulation the forms of evidence and expertise mobilized and means of intervention chosen to tame drugs in factories consulting rooms and courts

The Therapeutic Nightmare John Abraham, Julie Sheppard, 2014-03-18

How do drugs get to the market What controls are there and what procedures for monitoring their effects And how adequate are the regulators in protecting public health when new drugs have serious side effects The Therapeutic Nightmare tells the story of the sleeping pill Halcion a story which is far from over First marketed in the 1970s Halcion has been taken by millions of patients around the world For many years it has been associated with serious adverse effects such as amnesia hallucinations aggression and in extreme cases homicide Thirteen years after its first release it was banned by the British government It remains on sale in the United States and many other countries This book explains why patients have come to be exposed to Halcion's risks and examines the corporate interests of the manufacturers the professional interests of the scientists and medical researchers and the interests of patients in safe and effective medication It reveals how these contending forces shape the regulatory decision making process about drug safety As the number of new drugs and health products grows a major challenge facing regulators and the medical profession is how to put the interests of public health decisively and consistently above the commercial interests of the drugs industry while becoming more accountable to patient and consumer organizations

Familiar Medicine David Craig, 2002-06-30

One of the first medical ethnographies to be written on contemporary Vietnam Familiar Medicine examines the practical ways in which people of the Red River Delta make sense of their bodies illness and medicine Traditional knowledge and practices have persisted but are now expressed through and alongside global medical knowledge and commodities Western medicine has been eagerly adopted and incorporated into everyday life in Vietnam but not entirely on its own terms Familiar Medicine takes a conjectural interdisciplinary approach to its subject weaving together history ethnography cultural geography and survey materials to provide a rich and readable account of local practices in the context of an increasingly globalized world and growing microbial resistance to antibiotics Theoretically it draws on current critical and cultural theory in particular applying Pierre Bourdieu's work on habitus and practical logics in innovative but approachable ways David Craig addresses a range of contemporary fascinations in medical anthropology and the sociology of health and illness from the trafficking of medical commodities and ideas under globalization to the hybridization of local cultural formations

knowledge and practices His book will be required reading for international workers in health and development in Vietnam and a rich resource for courses in cultural geography anthropology medical sociology regional studies and public and international health
