Naval Aircraft:

United States Navy Aircraft Since 1911 Gordon Swanborough, Peter M. Bowers, 1976 *United States Navy Aircraft since 1911* has been completely revised and updated and like the earlier editions will become the standard reference work covering all the aircraft of the US Navy Marine Corps and Coast Guard

US Naval Aviation, 1898-1945 Leo Marriott, 2021-06-09 This pictorial history tells the story of US naval aviation from its early beginnings in the 1920s to its dominance in the Pacific theater of WWII The Japanese attack on Pearl Harbor sank or crippled almost all of the battleships in the US Navy's Pacific Fleet But the fleet's aircraft carriers survived and soon demonstrated the power of US naval aviation Thanks to pioneering technology and far sighted pre war policy the US Navy had the necessary ships aircraft and crews to turn the tide of the Pacific war With more than 200 rare photographs Leo Marriott traces the growth of US naval aviation from the flimsy seaplanes of the first years of the twentieth century to the mighty armadas that challenged those of the Japanese and after the carrier battles at Coral Sea and Midway led the advance across the Pacific Marriott puts special focus on the navy's first aircraft carriers of the 1920s the tremendous progress made in the decades between the wars in tactics and strategy and the innovative design of ships and aircraft themselves

United States Naval Aviation, 1919-1941 E.R. Johnson, 2014-01-10 Within six months of the devastating attack on Pearl Harbor the U S Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original Defeat Germany First strategy That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1 000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation This thorough study with detailed drawings and photographs explains and illustrates the trial and error process which went into developing the aircraft airships and ships of the interwar period The critical factors that shaped Naval Aviation after World War I naval treaties fleet tactics government programs leadership and organization as well as the emergence of Marine Corps and Coast Guard aviation are discussed in depth

Naval Air Philip Kaplan, 2013-07-03 Naval aviation arrived early in the last century in the form of balloons and airships employed by the British Royal Navy for reconnaissance and interest was stirring in naval circles in a greater aeronautical capacity for the service Britain's tradition of projecting a global reach through her sea power would in the view of many be greatly enhanced by such a capability Among the first advocates of military aircraft development was British naval minister Winston Churchill Over the course of the last century since this point of inception huge leaps have been made in the design development and performance of naval aircraft This comprehensive account brought to us by eminent aviation historian Philip Kaplan details the journey from origin through early development into wartime deployment This is carried forward through post war innovations and into modern conflicts such as the Falklands campaign Attention is paid to the key landmarks of aviation history such as Taranto Pearl Harbour The Doolittle Raid the Battle of Midway and the Korean campaign Reference is also paid throughout to the flying

aces the high points in the combat careers of the greatest naval and marine aviators of the past century Kaplan weaves multiple threads in an effort to produce a comprehensive and detailed history One of these is the part played by women in the history of flight detailing a journey characterised by ever closer involvement at the vanguard of aviation development showing how societal changes have impacted upon this area in tune with others Bringing the history up to date there is a section dedicated to the Helicopter its varying uses current disposition and status of the various types in the U S and British navies Complemented by a collection of interesting photographs this is sure to appeal to aviation enthusiasts as well as social historians of the past one hundred years this isn't just a history of the various aircraft but of the people who got them off the ground and flew them into a new century

Jets at Sea Leo Marriott, 2009-03-09 As World War Two drew to a close jet powered aircraft were beginning to be introduced into service To take advantage of this major development it was necessary for all the world's air powers to rethink combat tactics and develop the means of handling these faster and generally larger aircraft in the air on land and especially at sea As this modern breed approached and finally broke the sound barrier so did landing and takeoff speeds The decade after the war saw rapid developments in the design of both naval aircraft and their seaborne bases the aircraft carrier The first jet to land aboard a carrier was a modified de Havilland Vampire in 1945 on H M S Ocean Progress was rapid and the application of British inventions such as the angled flight deck steam catapult and mirror landing sight soon became adopted by the major navies of the world Naval aircraft too became more sophisticated by the addition of high lift flap systems and strengthened undercarriages to allow them to operate more safely at sea The author describes the development of these improvements and then their operational advantages in the Korean War and Suez He goes on to describe the US development of a potential nuclear carrier borne bomber the French Navy and its withdrawal from Vietnam in 1954 and then the use of naval aircraft for anti submarine work

Naval Aviation in the Second World War Philip Kaplan, 2013-10-30 The first aircraft carriers made their appearance in the early years of World War I These first flattops were improvised affairs built on hulls that had been laid down with other purposes in mind and it was not until the 1920s that the first purpose built carriers were launched but no one was as yet clear about the role of the carriers and they were largely unloved by the battleship admirals who still believed that their great dreadnoughts were the

ultimate capital ships World War II changed all that At Taranto Pearl Harbour and in the North Atlantic the carrier the ugly duckling of the world s navies proved itself to be the dreadnought nemesis As the tide of war turned the fast attack carriers of the U S Navy spearheaded the counter attack in the Pacific while the makeshift escort carriers helped to seal the fate of the German U boats in the Atlantic The carrier and naval aviation thus emerged into the post war world as the primary symbol and instrument of seapower it would play a crucial role in the strategic encirclement of the Soviet Union and enabled western airpower to be rapidly and effectively deployed in areas of conflict as remote as Korea Vietnam the Falklands and the Gulf Kaplan describes the adventure of the young American British and Japanese naval aviators in the Second World War It is an account of their experiences based on archives diaries published and unpublished memoirs and personal interviews with veteran naval airmen of WWII providing a vivid and often hair raising picture of the dangers they encountered in combat and of everyday life aboard an aircraft carrier It considers some of the key aspects of the WWII naval aviator s combat career such as why it was that only a tiny minority of these pilots those in whom the desire for aerial combat overrode everything accounted for such a large proportion of the victories In the major carrier actions of that conflict from the Royal Navy s attack on Taranto which crippled the Italian fleet in 1940 to the Japanese carrier launched surprise attack on U S Navy battleships and facilities at Pearl Harbour in 1941 to the carrier battle of Midway in 1942 and the Great Marianas Turkey Shoot of 1944 through the Japanese Kamikaze campaign against the U S Carriers in the final stages of the Pacific war this book takes the reader back to one of the most exciting and significant times in modern history

U. S. Naval Aviation in the Pacific United States. Office of the Chief of Naval Operations,1947 The purpose of this review which was prepared by officers on duty in the Operations Division including Air Combat Intelligence officers with extensive service in the Pacific is to analyze the relation between air and sea power It is based upon the experience of naval aviation in the war against Japan as recorded in the files of the Navy Department Reports of the United States Strategic Bombing Survey have also been consulted and the chart of the progress of the war has been taken from one of them The danger inherent in any report confined to one aspect of the war is that it may mislead the reader into forgetting that the conflict was won by a combination of ground naval and air forces each of which carried its share of the common burden All operated within the framework of strategic plans and it is the aim of this analysis to show how naval aviation fulfilled its part of those plans Since it is from the lessons of experience that plans for the future must be derived the report is presented in the hope that it will prove of some value to those responsible for the future security of the United
