**Applying the Roper-Logan-Tierney Model in Practice** Jane Jenkins, BA MSc SRN RNT, Jackie Solomon, MA, PGDip, SRN, Sue Whittam, Karen Holland, 2008-06-03 This title is directed primarily towards health care professionals outside

of the United States Applying the RLT Model in Practice has been written to enable students and their teachers in both Higher Education and clinical practice to explore the different dimensions of the model through a variety of case studies and exercises The case studies can be viewed as triggers for student problem solving skills in using the Model Many of the exercises are aimed at enabling readers to find evidence to support nursing activities The authors have incorporated an international perspective throughout the text Based on the most popular model used in general nursing care throughout the world Explicitly demonstrates how the RLT model can be used to assess plan deliver and evaluate individualised nursing care Applies the RLT model in the context of today s health services and links it to clinical governance and the multi disciplinary context of care Uses a problem solving approach with extensive use of exercises and case studies Attractive two colour design using boxes tables and summaries Fully updated throughout in line with changes in practice developments in the evidence base changes in the NHS e g modern matrons Modernisation Agency etc More material on how to apply the model in an inter disciplinary context Updated infection control section More on discharge planning More material relating to primary care

**Systematic Nursing Assessment** Deane B. Taylor, Onalee H. Johnson, 1974 Professional nurses have long been identifying and interpreting clues related to the gathering of information from which such decisions could be consistently drawn The organization systematization and clustering of such clues required an extensive search of what was meaningful to nurses in different clinical settings The research staff who designed the project as a contract to fulfill some basic goals for collecting disseminating and utilizing information data for patients records have spent 3 years refining an assessment tool with two major factors in mind First a guideline was needed to obtain the most accurate information possible about individual patients in the context of their families and the community Second an assessment tool was needed which was computer manageable in the sense that it could be adapted to an on line system of computer input and retrieval which would supply significant information to multiple sources Two major sets of assessment records have been developed from an exhaustive trial of forms in a variety of settings Consultation has been obtained from resources country wide to insure as broad a view as possible of the current efforts in the development of new record systems Faculty students and nursing service staff members in hospitals and community health agencies have participated in the trials of these forms in real situations

**Nurse's Handbook of Health Assessment** Janet R Weber, RN Edd, 2013-11-18 Renowned for its holistic perspective and step by step approach this pocket size text takes you through every stage of the nursing assessment for adults and special populations The book s see and do guidance provides all that you need to perform a range of common assessment procedures with confidence
